

# Stallion Information February 2015

# Stallion Information 2015

This 2015 Stallion Information is being presented to you as an aid in choosing a stallion. When choosing a stallion it is not just important to use the best-quality stallions but it is even more important to make the correct combinations. The KFPS strives to make as many breeding data on its stallions available as possible.

## Which stallions?

In the 2015 edition of Stallion Information all active stallions are displayed. For exterior, by viewing the results, the young stallion's offspring information is still not included. These breeding values are based on breeding pedigree data and the exterior assessment (linear score) of the stallion itself. For stallions that the offspring have gone through, the results are almost entirely based on test data (linear score) of offspring. The reliability of the results of young stallions is still low. This means that the results can change more (as descendants are inspected) than the older stallions with a high reliability. By the lower reliability of the results of younger stallions, these cautious estimates are closer to the breed average (100).

## Which characteristics?

The following characteristics of the stallions are included:

1. Breeding value linear exterior characteristics
2. Breeding values for sport aptitude

## Breeding values exterior and sport aptitude

Given the complexity of the breeding-value estimation for the exterior characteristics and sport aptitude an explanation of the origins and the interpretation of the numbers is necessary. In this explanation we also touch upon how the numbers can be used for choosing a stallion.

## The linear characteristics

The breeding values for the exterior characteristics are based on the linear scores, which since 1993 are documented for every studbook registration of the horses. Of the 25 exterior characteristics a score is given between 5 and 45, with an average of 25. For the linear characteristics it specifically concerns an observation and not a rating. The characteristics have been chosen such that the linear report provides a picture of the horse's exterior that is as complete as possible. The linear characteristics can be divided in two categories:

1. The optimal characteristics: the characteristics for which the average score (25) or breeding value (100) is most desired. Examples of such characteristics are: shape of the back, conformation of the front legs, and shape of the hind legs.
2. Maximum characteristics: the characteristics for which goes the

higher the better (example: expression of the face, expression of movement, etc.) or characteristics of which the optimum lies clearly above average, such as slope of the shoulder and shape of the croup. The difference has been visualized by depicting the breeding values for the maximum characteristics with dark-blue bars (favorable) and red bars (unfavorable), and the breeding values for the optimum characteristics with light-blue bars. In addition to the 25 linear characteristics the overview consists of a measured characteristic: the height at the withers.

## The rated characteristics

In addition to the 25 linear exterior characteristics also five rated characteristics are scored: breed type, build, legs, walk, and trot. For the linear characteristics it concerns a descriptive value, for the rated characteristics it concerns a rating. When evaluating the rated exterior characteristics the related linear characteristics play an important role. In addition non-linear scored segments can play a role. The characteristic trot, e.g., consists in addition to the linear characteristics length of the trot, strength of the trot, balance, and suppleness also of, e.g., rhythm/regularity of the trot. The rated characteristics are scored from 4 through 9.

## Sport aptitude

The breeding values are based on the ABFP results as these have been gathered by KFPS over the years, also as part of the testing on offspring. The reasons that this particular data is used for the breeding-value estimation instead of, e.g. sport results are the following: 1. ABFP information is available much earlier than sport data. 2. ABFP data is for a larger part hereditary (higher  $h^2$ ) than sport data. That is thanks to the uniform training, presentation, and evaluation. 3. Number of offspring per stallion in sport is in general (still) too low. 4. The ABFP data gives information on segments (basic gaits, suitability as show-driving horses, riding horses, and driving horses).

## The estimation model

The breeding values, estimated by CRV / Dutch Cattle Syndicate, are estimated with a so-called estimation model. This estimation model indicates for which influences the differences between (in this case) stallions are corrected. The exterior scores are corrected for the following effects: breeding value of the dam →

## Stallions approved on progeny

of the offspring, age at the time of inspection, gender, linear evaluator, and inspection. This correction takes place to get an insight as pure as possible in to what degree the differences in offspring groups are caused by difference in genetic aptitude of the stallions. With these correction factors it basically does not matter in what area or on what mares a certain stallion is used. The kind of evaluation model that is being used is the so-called animal model. With an animal model in addition to data on offspring also information of family members is included. The contribution of this information declines as more information on the offspring becomes available.

### Interpretation of the breeding values

The breeding values are indicated in an average of 100 with a spread of 4 points. This basis was determined in 2001. The average breeding values of all horses born in 2001 is for each characteristic set at 100 and the spread (standard deviation) of these breeding values is set at 4. Breeding values with a deviation compared to 100 of one time the spread (between 96 and 104) have to be considered as average. Over two thirds of the breeding values are in this margin. It goes without saying that the larger the deviation is compared to 100, the larger the expected effect is. A stallion with a breeding value of 109 or higher for, e.g., strength of movement, belongs to the 2% best stallions of the population. For a breeding value higher than 112 this is 0.1%.

### Reliability of the Breeding values

The breeding values are indicated per characteristic with 'bars.' As mentioned the maximum characteristics are indicated by dark-blue bars (favorable) and red bars (unfavorable) and the optimal characteristics by light-blue bars. For the maximum characteristics goes that results to the left are unfavorable (red) and results to the right are favorable (dark-blue). For the optimal characteristics goes that (extreme) results to both the left and right are unfavorable; 100 is optimal here. Summarized: Bars to the left are always unfavorable and bars to the right are favorable, except for the light blue bars.

### Reliability

The degree to which the breeding value provides a precise image of the actual genetic aptitude of a stallion is expressed in the reliability (betrouwbaarheid / btbh.). The reliability is especially influenced by the number of inspected offspring. With a low reliability the breeding values can still change considerably when more offspring are inspected. The reliability can be interpreted as followed:

Reliability	Interpretation
Less than 70%	moderately reliable
70-80%	reasonably reliable
80-90%	reliable
>90%	very reliable

### Use of the exterior breeding values

The exterior breeding values are an excellent aid for making a correct mare-stallion combination. This can be done by looking at the mare's linear score form for the items that can be considered

for correction. If the characteristic that needs to be corrected is a maximum characteristic then a stallion needs to be selected that has a (clearly) positive hereditary effect on this characteristic (bar to the right). If it concerns an optimal characteristic then the best choice is a stallion with an average breeding value or a slight deviation in the opposite direction, depending on the score of the mare.

### Use of the breeding values for sport aptitude

As you can see breeding values have been estimated for the basic gaits in the exterior bar and in the sport aptitude bar. The former is based on the evaluation of the basic gaits in the inspection ring (in hand), while the latter is based on the evaluation of the basic gaits in use (ABFP test). For most of the stallions these breeding values largely match. There are, however, stallions that have a breeding value for the basic gaits in the sport index that is quite a bit lower than the breeding value for the basic gaits in the exterior bar. Given the fact that the breeding goal indicates that we want to breed horses that have good gaits in especially their use the breeding values for sport aptitude should weight more heavily in your evaluation of the stallions.

### Kinship percentage

All Studbook stallions are given a rating for kinship percentage. This figure reflects a stallion's kinship to the population as a whole. The lower this percentage, the more such a stallion can contribute to outcrossing. The average percentage of Studbook stallions lies around 17.5%. The kinship percentage defines the average inbreeding of a particular stallion to all horses of the reference population. The reference population includes all horses from the youngest year collections. For the calculation of inbreeding all known generations are considered (instead of only the first 5 generations). The kinship percentage is influenced by the degree in which bloodlines correspond with or deviate from the population. The kinship percentage will increase in proportion to the degree in which a particular stallion is used. Calculations of kinship percentages include a correction to make up for missing pedigree information. Therefore the kinship percentage of stallions with a 'short dam line' contain an upward adjustment. The kinship percentage is one of the characteristics which are considered for the selection of young stallions to restrict the increase of inbreeding. As a result of kinship percentages and stud limitations the increase in inbreeding of recent year collections has dropped below the current norm of 1% per generation.

### Stallion information online

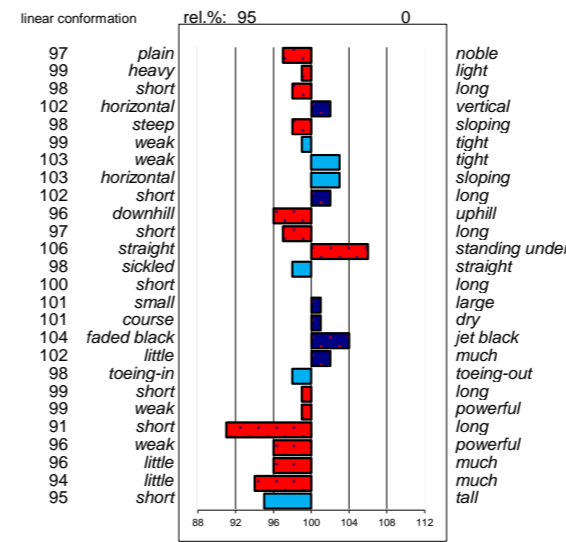

On the KFPS website ([www.kfps.nl](http://www.kfps.nl)) you also find the digital version of the Stallion Information. You can find it under the heading 'Breeding information' or 'My Horse' and here you will find even more detailed information about the stallions. In addition, you can make stallion selections by indicating selection criteria. In the digital version of the Stallion Information all Stallions are included.

**List of KFPS Studbook Stallions 2015**

Below are the studbook stallions with a breeding permit stationed in the Netherlands for 2015.

Name Stallion	Owner	Station	
Ulke 338	W. Wester, Tjerkgaast	Dekstation Gaasterland, Oudemirdum, Tel.: +31 (0)514-572111/604111	S.W.S.
Abel 344	Opfok en Handelstal Tj. Bouma, Terkaple	Opfok en Handelstal Tj. Bouma, Terkaple Tel.: +31 (0)566-689741	Nat. Dek.
Abe 346	Tj. en G. Bosma, Kollumerzwaag	Tj. Bosma, Kollumerzwaag, Tel.: +31 (0)511-444820	S.W.S.
Fabe 348	E.A. Constant, Kwadijk	De Nieuwe Heuvel, Lunteren, Tel.: +31 (0)318-483284	S.W.S.
Fède 350	P. Kruidenier, Rhoon		S.W.S.
Jasper 366	T. Wijma, Jislum	Ancilla Bruggink, Boijl, Tel.: +31 (0)6-51923992	S.W.S.
Onne 376	Gebr. Van Manen, Ede	Gebr. Van Manen, Ede, Tel.: +31 (0)318-513371	S.W.S.
Ielke 382	Gebr. Van Manen & M.C. van der Weide, Schoonderbeek, p/a Ede	O.L. en M.C. v/d Weide, Ansen, Tel.: +31(0)522-470405 of +31(0)6-53751411	S.W.S.
Teeuwis 389	Fam. Folmer en D. de Jong, Lunteren	Stal de Oergong, Huins, Tel.: +31 (0)6-20005570 of +31 (0)6-51032888	S.W.S.
Rik 396	Opfok en Handelstal Tj. Bouma & K. de Vries, p/a Terkaple	Opfok en Handelstal Tj. Bouma, Terkaple Tel.: +31 (0)566-689741	S.W.S.
Tsjalke 397	Joke Toonen, Maren-Kessel	G. Toonen, Maren-Kessel, Tel.: +31 (0)412-479242	S.W.S.
Wikke 404	Stoeterij Galloper, Berkel en Rodenrijs	A. Couperus, Oostermeer, Tel.: +31 (0)512-471336	S.W.S.
Rindert 406	R.J. Rienstra, Wommels	Dekstation de Terpen, Wommels, Tel.: +31 (0)515-332505	S.W.S.
Beart 411	Gebr. Van Manen & R.J. Rienstra, p/a Ede	Gebr. Van Manen, Ede, Tel.: +31 (0)318-513371	S.W.S.
Bente 412	E.A. Constant, Kwadijk	M. Schreven, Weert, Tel.: +31 (0)495-521472 of +31 (0)6-20399084	S.W.S.
Aan 416	Tj. Bosma, Kollumerzwaag	Tj. Bosma, Kollumerzwaag, Tel.: +31 (0)511-444820	S.W.S.
Eibert 419	M. Jellesma & S. Hoekstra, p/a Rotstergaast	O.L. en M.C. v/d Weide, Ansen, Tel.: +31(0)522-470405 of +31(0)6-53751411	S.W.S.
Felle 422	O.L. & M.C. van der Weide, Ansen	O.L. en M.C. v/d Weide, Ansen, Tel.: +31(0)522-470405 of +31(0)6-53751411	S.W.S.
Haitse 425	A.P. Both & A. Zwaagman, p/a Voorthuizen	Stal de Oergong, Huins, Tel.: +31 (0)6-20005570 of +31 (0)6-51032888	S.W.S.
Gjalt 426	E.A. Constant, Kwadijk	M. Schreven, Weert, Tel.: +31 (0)495-521472 of +31 (0)6-20399084	S.W.S.
Jorn 430	J. Boogaert, Weert	M. Schreven, Weert, Tel.: +31 (0)495-521472 of +31 (0)6-20399084	S.W.S.
Loadewyk 431	A.P. Both, Voorthuizen	De Holm, Zevenhuizen, Tel: +31(0)594-632247 / (0)6-51230975	S.W.S.
Jense 432	P. Kruidenier, Rhoon	Tj. Bosma, Kollumerzwaag, Tel.: +31 (0)511-444820	S.W.S.
Jerke 434	A.P. Both, Voorthuizen	M. Schreven, Weert, Tel.: +31 (0)495-521472 of +31 (0)6-20399084	S.W.S.
Jesse 435	M. Jellesma, Rotstergaast	M. Jellesma, Rotstergaast, Tel.: +31 (0)513-551259 /+31 (0)6-51506347	S.W.S.
Maurits 437	W. Wester, Tjerkgaast	Dekstation Gaasterland, Oudemirdum, Tel.: +31 (0)514-572111/604111	S.W.S.
Mewes 438	H. Eppinga & P. Priester, p/a Oudemirdum	Dekstation Gaasterland, Oudemirdum, Tel.: +31 (0)514-572111/604111	S.W.S.
Maeije 440	Iron Spring Farm, Coatesville U.S.A.	Tj. Bosma, Kollumerzwaag, Tel.: +31 (0)511-444820	S.W.S.
Michiel 442	H.J. Mulder, Vegelinsoord	Fam. J.A.M. Kruis, Heeg, Tel.: +31 (0)6-46234423	S.W.S.
Norbert 444	T. en J. van der Zee, St. Jacobiparochie	Gebr. Van Manen, Ede, Tel.: +31 (0)318-513371	S.W.S.
Olgert 445	E.A. Constant, Kwadijk	Stal Wijdewormer, Kwadijk, Tel.: +31 (0)299-439443	S.W.S.
Stendert 447	S.J. Kat B.V., Beverwijk	Stal de Oergong, Huins, Tel.: +31 (0)6-20005570 of +31 (0)6-51032888	S.W.S.
Pier 448	S.J. Kat B.V., Beverwijk	De Holm, Zevenhuizen, Tel: +31(0)594-632247 / (0)6-51230975	S.W.S.
Sipke 450	Stoeterij Bommelsteyn, Joure	De Nieuwe Heuvel, Lunteren, Tel.: +31 (0)318-483284	S.W.S.
Anders 451	N.J.C. Pienaar, Potchefstroom	Stal de Mersken, Siegerswoude, Tel.: +31 (0)6-50247820	S.W.S.
Reinder 452	Tj. Bosma, Kollumerzwaag	Tj. Bosma, Kollumerzwaag, Tel.: +31 (0)511-444820	S.W.S.
Sjouke 453	A.P. Both, Voorthuizen	A. Couperus, Oostermeer, Tel.: +31 (0)512-471336	S.W.S.
Tsjalle 454	Fam. Age Okkema, Siegerswoude	Stal de Mersken, Siegerswoude, Tel.: +31 (0)6-50247820	S.W.S.
Take 455	A.P. Both & S.J. Kat B.V., p/a Voorthuizen	De Nieuwe Heuvel, Lunteren, Tel.: +31 (0)318-483284	S.W.S.
Tymon 456	Stoeterij Bommelsteyn, Joure	Stoeterij Bommelsteyn, Joure, Tel.: +31 (0)513-468100	S.W.S.
Uldrik 457	A.P. Both & S.J. Kat B.V., p/a Voorthuizen	De Nieuwe Heuvel, Lunteren, Tel.: +31 (0)318-483284	S.W.S.
Tonjes 459	Jack Vanderkooy, St. Thomas	Stoeterij Bosksicht, Rijs, Tel.: +31 (0)6-20409241 /+31 (0)6-54685802	S.W.S.
Wimer 461	A. Minkema & G.A. Bouma, p/a Rottevalle	Henswoude, Oldeboorn, Tel/fax.: +31 (0)566-631364 / (0)6-51003902	S.W.S.

# Tjaarda 483

**Lineage:** Time 398 x Ster Lolke 371  
x Stb Fabe 348 x Star Wypke 277 **Date of birth:** 26 maart 2006 **Height:** 1,68 m  
**Pedigree:** 32 **Kinship:** 16,8% (favourable)

## EXTERIOR:

**Breeding type:** Tjardo V. is a stallion with more than satisfactory breed characteristics, abundant feathers and jet black coat colour. The head is sufficiently noble. The neck has a satisfactory vertical build but is not overly long.

**Conformation:** Tjardo V. is a stallion with correct conformation and a very youngish appearance. He lacks a bit of length in top line. Shoulder conformation is somewhat steep. He has a nice upward build with a long foreleg. Croup conformation is correct and long. **Legwork:** The foreleg is a bit cow-hocked (toeing-out), the hind leg has a correct stance with lots of quality. There are no veterinary observations. **Walk:** The walk has more than satisfactory power with good rhythm and a lot of activity. **Trot:** The trot shows satisfactory self-carriage but the horse should develop better use of the foreleg.

## Estimated breeding value exterior::

Reliability .....	43%
Breeding type .....	103
Conformation .....	103
Legwork .....	101
Walk .....	107
Trot .....	104

## Performance test:

The Re-inspection Jury has selected the stallion for the Short Test on the basis of:  
**1)** The stallion's performances in driving

sports. In addition, the stallion has more than proved himself in showdriving sports and sufficiently in dressage. **2)** Exterior assessment on 13 December 2013

**3)** The stallion has met the requirements for semen quality and X-ray testing.

### 4) DNA-tests:

**-chestnut factor:** negative;

**-dwarfism:** negative;

**-hydrocephaly:** negative

The stallion was presented (in-hand) during the Stallion Inspection on 11 January 2014.

## Character assessment:

The Short Test (character assessment) took place in Drachten from February 10th to February 21st 2014.

**Stable manners:** Tjardo V. is a friendly and reliable stallion with pleasant, calm and relaxed stable manners. **Attitude towards work:** Tjardo V. has a good attitude, is easy to train as well as forward-going and moves with a nice contact.

## Assessment of guest rider/competitions:

The walk shows more than satisfactory rhythm and power. The trot is a bit short with satisfactory rhythm. The foreleg should extend more and should show more elasticity. The canter displays more than satisfactory strides, is regular and uphill. Transitions are more than satisfactory and especially in canter the horse demonstrates that extensions and transitions within the pace come easy to

him. The stallion displays great carrying capacity and a talent for self-carriage in all paces. It must be said however, that agility (use of body and lengthening in the frame) is fairly poor. Contact, responsiveness to the hand and straightness are good. The stallion has good capacity for transitions and is hardworking.

**Final conclusion:** Thanks to his outstanding results in driving sports the stallion Tjardo V. has qualified for taking part in the Short Test. He has a relatively low kinship bloodline and a good exterior. The outcome of character assessment is positive. Tjardo V. will be registered in the Studbook under the name of Tjaarda 483.

**Dam report:** Tjaarda 483's dam is the Lolke 371 daughter Daisy W. She died in 2013 as a 12-year-old and consequently no recent inspection report is available. Daisy W. was registered in the Studbook at the age of three and upgraded to Star mare at the age of four. Daisy W. has eight registered offspring. In addition to Tjaarda 483 two other offspring (one stallion and one mare) have become Star. Two offspring (one stallion and one mare) have not been inspected as adult horses. There are 3 more young offspring that have not yet been inspected as adult horses.

**Stud advice:** Tjaarda 483 is a good match for mares with satisfactory rectangular build and more than satisfactory basic gaits in order to enhance canter, trainability and character. →

# Jehannes 484

**Lineage:** Tsjalle 454 x Star Preferent Oepke 266 x Star Preferent Fokke 217 x Stb Tsjalling 235  
**Date of birth:** 1 januari 2011 **Height:** 1,67 m  
**Pedigree:** 15 **Kinship:** 17,4% (average)

## Exterior:

**Breeding type:** Johannes is a fine, true-to-type stallion. His head shows satisfactory expression. He has a long, beautifully-shaped neck with a nice vertical build. He flaunts abundant feathers and a jet black coat colour. **Conformation:** Johannes is a harmonious and more than satisfactory uphill stallion with a correct top line. The croup is of more than satisfactory length with the right conformation (slightly sloping). Positioning of the shoulder is correct. **Legwork:** The stance of the hind legs is correct. The legwork is of more than satisfactory quality. The stance of the foreleg is slightly toeing-in. Shape of the feet is correct.

## DNA-tests:

**Hydrocephaly:** non-carrier status  
**Dwarfism:** assumed carrier status\*  
**Chestnut factor:** non-carrier status  
 \* the addition 'assumed' reflects the fact that the test used for this characteristic was a marking test and not a DNA test. The possibility of a false reading (both positive or negative) is present, though very small.

## Estimated breeding value exterior:

Reliability .....	39%
Breeding type .....	108
Conformation .....	108

anxious						x	relaxed

## Performance test:

**Training report:** When he arrived, Johannes F. van Dedgum was well-schooled in ridden work and driven work. Johannes stands out because of his fine posture and good trainability. During the entire test the stallion remained somewhat tight in his top line and struggled a bit with lengthening of the frame, which slightly affects his moment of suspension. In all disciplines his good balance and willingness to work are prominent features which give his trainers a good to very good impression. **Walk:** The walk is regular and roomy with satisfactory reach in front. In walk the stallion displays an active hind leg. **Trot:** The trot has satisfactory forward-reaching movement. The very active hind leg is placed far under the body. **Canter:** The canter strikes off from an active hind leg and shows good rhythm. The stallion should develop more suppleness in canter.

## Riding horse aptitude:

Johannes has three more than satisfac-

tory to good basic gaits with a particularly good use of the hind leg. Because of his fine posture the stallion strikes a beautiful image and shows good balance. He needs to develop a bit more suppleness/use of the back. Transitions come easy to him (especially downwards), while he keeps moving well from a carrying hind leg during the transition.

## Driving horse aptitude:

In driven work Johannes stands out mainly because of his fine front and posture. He demonstrates an active hind leg which he places far forward under the body. The stallion must develop a better moment of suspension. He has a very active foreleg with more than satisfactory length of stride.

## Test results riding test:

Use hind leg .....	7.5
Suspension .....	6.5
Self-carriage .....	8.5
Front .....	9.0
Agility .....	6.5
Impulsion .....	8.0
<b>Total .....</b>	<b>85.0</b>

## Findings Performance Test:

Johannes has given good performances in all three disciplines and has shown continuous progression throughout the whole test. **Final conclusion:** Johannes F. van Dedgum is a stallion with good

lineage and a good exterior. He has achieved fine results in all three disciplines of the Performance Test. On the basis of these findings the stallion will be registered in the Stallion Studbook under the name of Jehannes 484.

**Dam report:** Jehannes 484's dam Femke van Dedgum died in 2012 at the age of 19 and has therefore not been inspected. She is a Star mare by Oepke 266 and has twice been awarded with a second premium at inspections. Femke has 14 registered offspring. She has 8 registered daughters, of which one has not yet been inspected (a 2-year-old full sister to Jehannes 484). Out of the 7 inspected daughters two have received the Crown predicate (both daughters of Olof 315) with one of these also having achieved the Sport predicate. Four daughters have been awarded the Star predicate, with one of them being the famous nine times over first premium mare Minke van Dedgum (Monte 378). One mare has been registered in the Studbook without predicate. Out of her six male offspring two were inspected at an adult age. One is Jehannes 484 and the other one is a gelding who has become Star. Jehannes 484's granddam is also Star as well as Preferent. Four daughters of this Fokke 217 daughter have become Star with two of them also having risen to Preferent status. It is found that both dam and granddam are fine mares who breed very well. The next generations of the dam line are less rich in predicates.

**Stud advice:** Jehannes 484 is as stallion who will enhance breeding type and who will have a positive effect on correctness of conformation (harmony). In terms of movement he is expected to have a positive influence on hind leg use and he will above all have a corrective effect on mares with a somewhat slow hind leg. When using Jehannes 484 it must be taken into account that he is a carrier of the dwarfism factor.

# Jouwe 485

**Lineage:** Pier 448 x Crown Sport Folkert 353 x Star Leffert 306 x Stb Preferent Oege 267  
**Date of birth:** 12 mei 2011 **Height:** 1,71 m  
**Pedigree:** 223 **Kinship:** 18,0% (average)

### Exterior:

**Breeding type:** Jester is a stallion with satisfactory breeding type. His head has more than satisfactory expression. The neck has satisfactory length but should have more vertical build and the head-neck connection is a bit too heavy. The stallion has more than satisfactory feathers and coat colour is black. **Conformation:** In spite of his tall build Jester has a harmonious, proportionate build with a correct top line. The croup is long with the right conformation (slightly sloping). The stallion has more than satisfactory length in the foreleg but should have a slightly more upward build. **Legwork:** The hind legs are slightly sickle-hocked. The legwork is of more than satisfactory quality. The forelegs are a little bit cow-hocked (toeing-out). The stallion has generously-shaped feet.

### DNA-tests:

**Hydrocephaly:** non-carrier status  
**Dwarfism:** assumed carrier status\*  
**Chestnut factor:** non-carrier status  
 \* the addition 'assumed' reflects the fact that the test used for this characteristic was a marking test and not a DNA test. The possibility of a false reading (both positive or negative) is present, though very small.

### Estimated breeding value exterior:

Reliability .....	45%
Breeding type .....	107
Conformation .....	112

### Character:

#### Contact manners:

	a	b	c	d	e	
<b>Stable manners</b>						
difficult					x	pleasant
energetic					x	calm
frightened				x		inquisitive
submissive				x		dominant
hesitant				x		cheeky
anxious					x	relaxed

### Performance test:

**Training report:** After a delay Jester V. fan de Miedwei joined the test on 30 September 2014. At that time he was well-trained in ridden- and driven work. Jester works with a lot of activity but particularly in the early days of the test he was struggling with suppleness. This affected his motion sequence and resulted in a restless contact, which however improved during the course of the test. Especially in the driving disciplines the stallion made a positive impression in terms of activity and impulsion. He is very quick to respond to the aids and leaves his trainers with a good to very good feeling.

**Walk:** In walk the stallion moves with more than satisfactory scope of movement, activity and regularity.

**Trot:** In trot he shows strikingly good use of the hind leg. He has a powerful hind leg which he places well forward under the body. He has great capacity for extending but must learn to move in a more uphill frame.

**Canter:** The canter shows more than satisfactory length of stride and engagement but he should develop a more uphill outline.

### Riding horse aptitude:

Jester has three more than satisfactory basic gaits with an especially powerful hind leg. He demonstrates more than satisfactory agility and balance, but must move in a slightly more uphill frame. He has great capacity for extending.

### Driving horse aptitude:

In driven work the stallion catches the eye, mainly because of his excellent use of both fore- and hind leg. The hind leg is powerful and placed well forward under the body with a good moment of suspension. The foreleg is placed far forward with a beautiful motion and good length of stride. In all this the stallion must now learn to move with a bit more posture but has shown a positive development in the course of the test.

### Test results riding test:

Walk .....	7.5
Trot .....	7.5
Canter .....	7.0

Front .....	7.0
Agility .....	7.5
Impulsion .....	8.0
<b>Total .....</b>	<b>87.5</b>

### Findings Performance Test:

In all three disciplines Jester has given good presentations. He has progressed very positively in the course of perfor-

mance testing. He has shown to have a particular talent for showdriving. **Final conclusion:** Jester V. fan de Miedwei is a stallion with more than satisfactory scores for exterior and a good lineage. He has performed really well during the Central Examination. On the basis of these findings the stallion will be registered in the Studbook under the name of Jouwe 485.

**Dam report:** Jouwe 485's dam is the 9-year-old Crown mare Ryanne V. who has recently acquired the Sport predicate on the strength of her achievements in driving sports. This Folkert 353 daughter is a true-to-type mare with a nicely-shaped neck. She is a correctly-built mare with an uphill body. Top line is correct and the croup shows more than satisfactory length, but has above average slope. The hind leg has a correct stance but the foreleg is a bit cow-hocked (toeing-out). The legwork is dry and clean. The walk should have a little more length of stride but has activity. In trot the mare displays a good hind leg, lots of scope and moves in an uphill frame. Ryanne V. has 4 registered offspring. In addition to Jouwe 485 this concerns one stallion who has not become Star and a (as yet uninspected) yearling stallion. Ryanne V.'s only daughter has received the Star predicate with a first premium (sire Haitse 425). Granddam Wike V. is a first premium Star mare by Leffert 306 who has scored 71 points in an ABFP Test and 70,5 points in an IBOP Test. At present three offspring of this now 15-year-old mare have risen to Star. Jouwe 485's great granddam is a Studbook mare by the Preferent Oege 267 and she has as many as 9 registered Star offspring. The fourth mare in the dam line is Star, the fifth mare is a subsidiary section mare who was born in 1971.

**Stud advice:** Because of his size Jouwe 485 is expected to increase height at withers and have a positive influence on correct conformation. He should be used for mares with a good front but should not be paired to mares with a down-hill frame. Jouwe 485's outstanding feature is definitely his use of the hind leg. This asset makes him a good option for many mares. When using Jouwe 485 it must be taken into account that he is a carrier of the dwarfism factor.

# Stendert 447

**Date of birth:** 30-3-2005  
**Breeder:** A. Bos, Sint Anthonis  
**Owner:** S.J. Kat BV, Beverwijk  
**Lineage:** Andries 415 x Model Pref.\*10 Piter 312 x Model Pref.\*5 Lammert 260P x Model Pref.\*5 Tsjalling 235 P (mareline 50)  
**Kinship:** 17,8%

**General:**

As a 3-year-old, Stendert 447 was approved in the autumn of 2008 on the basis of his lineage which lists many predicates, his good exterior and his good results in the Central Examination, especially in driven work. During his first stud seasons Stendert 447 was much in demand and he was mostly paired to good-quality mares (94% of his registered foals from the first two crops have (at least) a Star dam). The stallion completed the Progeny Test in 2014 based on two crops of (minimum) 3-year-old descendants.

**Exterior:**

**General** Stendert 447's offspring are a very uniform group of well-developed horses with satisfactory breed expression who in terms of conformation and movement demonstrate little athletic capability. **Breeding type** The offspring of Stendert 447 are horses with more than satisfactory breed expression and have heads that are sufficiently expressive. The length of their necks is satisfactory and vertical build is more than satisfactory. Many offspring have necks that are somewhat heavy (especially the head-neck connection) with a so-called upside down neck. The horses have more than satisfactory feathers and above average black coat colour. **Conformation** Stendert 447's offspring are generously developed

horses, though often a bit heavy which diminishes their youthful appearance. The horses should have a bit more length in the foreleg and a more upward build. Shoulder conformation is average and they have correct backs although in some cases the loins are a little too tight. They have long croups with slightly too much slope. **Legwork** The hind legs are slightly sickle-hocked. Movement of the foreleg is correct but stance is often standing under and the legs are more than satisfactorily clean and dry. Shape of the feet is more than satisfactory. **Walk** The walk shows satisfactory scope of movement but in walk the horses lack flexion in the hock and activity. **Trot** The trot shows satisfactory reach in front but the horses need to develop more carrying capacity from the hind leg. The horses lack suppleness and balance.

**Sport aptitude:**

**Training report and character** The Progeny Test for Stendert 447 included 20 offspring consisting of fifteen 3-year-olds and five 4-year-olds, thirteen mares and seven stallions. Stendert 447's offspring have good stable manners. The horses demonstrate more than satisfactory reliability and good trainability in work. Some offspring sometimes struggle with focusing on the job. **Walk** The walk has satisfactory to

more than satisfactory forward reach with more than satisfactory rhythm. In walk the hind leg lacks activity. **Trot** The trot has satisfactory forward-reaching movement but the hind leg lacks activity and carrying capacity. **Canter** The canter shows more than satisfactory engagement and quality of stride but should be more uphill. **Riding horse aptitude** Under saddle the offspring demonstrate more than satisfactory forward reach and scope of movement. The hind leg lacks activity and should develop more carrying capacity which is why the horses are moving on the fore-hand. They need to show more impulsion. **Driving horse aptitude** The horses possess more than satisfactory front and satisfactory posture. They display satisfactory forward reach in the forelegs.

**Conclusion:**

In terms of numbers as well as quality Stendert 447 has had many opportunities in breeding. Taking this into consideration it must be concluded that, judging from the results of his offspring, the stallion has not been able to live up to the expectations. This has resulted in fairly neutral breeding values for exterior and sport aptitude. On the other hand, the stallion's progenitive qualities are not found to show any significant flaws. On the basis of these findings Stendert 447's breeding licence will be sustained.

# Pier 448

**Date of birth:** 14-4-2005  
**Breeder:** C.J. van de Maden, Lage Zwaluwe  
**Owner:** S.J. Kat BV, Beverwijk  
**Lineage:** Beart 411P x Ster Aiso 279 x Stb. Pref.\*4 Mark 232P x Stb Oene 201 (mareline 15)  
**Kinship:** 17,7%

## General:

As a 3-year-old, Pier 448 was approved in the autumn of 2008 on the basis of his satisfactory lineage, his more than satisfactory exterior and his good results in the Central Examination. In terms of numbers he has had ample opportunities for breeding, and compared to the other stallions of his year his mares were of average quality (68% of the registered foals from his first two crops have (at least) a Star dam). Pier 448 completed the Progeny Test in 2014 based on two crops of (minimum) 3-year-old descendants.

## Exterior:

**General** The offspring of Pier 448 are a very uniform group of horses with long top lines, correct conformation and satisfactory breeding type, whose movement catches the eye because of their powerful use of the hind leg and natural balance. Out of the first crops the mares have left a better impression than the stallions. **Breeding type** The offspring of Pier 448 are horses with satisfactory breeding type. Their heads are often a bit large and would gain from being slightly more expressive. Their necks have more than satisfactory length but should have a slightly more vertical build. The horses have above average black coat colour and

more than satisfactory feathers.

**Conformation** Pier 448's offspring are rather sturdy horses that seem to be a little bit on the heavy side. The horses have long forelegs and present nice uphill frames. Shoulder conformation is average, back conformation is correct but the loins are often a little too tight. They have correct croup conformation (slightly sloping) with good length in the croup.

**Legwork** The hind legs are slightly sickle-hocked. Foreleg conformation is correct and the legs are more than satisfactorily clean and dry with generously shaped feet. **Walk** The walk is very roomy with more than satisfactory activity.

**Trot** In trot Pier 448's offspring demonstrate great length of stride from a powerful and engaged hind leg. The horses move with more than satisfactory balance and suppleness. In trot they need to develop more forward reach of the foreleg (which is at variance with the impression they gave in the ABFP).

## Sport aptitude:

**Training report and character** Van The Progeny Test included twenty of Pier 448's offspring, in total sixteen 3-year-olds and four 4-year-olds, nineteen mares and one stallion. Another stallion has completed the Central Examination (the approved Jouwe 485).

All Pier 448's offspring are very pleasing,

inquisitive and calm horses with good stable manners. They are reliable horses to work with and they have more than satisfactory learning abilities but sometimes should be a bit more responsive to the aids. **Walk** The walk is regular and roomy with more than satisfactory hind leg activity. **Trot** They trot with roomy strides and self-carriage. They have a powerful hind leg which in some cases could be just a fraction faster.

**Canter** In canter they demonstrate good balance. They show a satisfactory uphill outline in canter with powerful strides from engaged hind legs.

**Riding horse aptitude** In ridden work the offspring display a powerful hind leg in all three basic gaits which is one of the reasons why they all move with good balance. **Driving horse aptitude** In driven work the horses demonstrate a powerful and carrying hind leg resulting in a more than satisfactory moment of suspension. The horses possess satisfactory front and satisfactory to more than satisfactory posture. They display good forward reach in the forelegs.

## Conclusion:

Pier 448 clearly has positive progenitive qualities for exterior (conformation) and sport aptitude. On the basis of these findings his breeding licence will be sustained.

# Anders 451

**Date of birth:** 26-3-2000  
**Breeder:** M. Reynders, Hechtel-Eksel (B)  
**Owner:** N.J.C. Pienaar, Potschefstroom (ZA)  
**Lineage:** Adel 357 x Ster Prest. Ouke 313 x Ster Pref.\*5 Bjinse 241 x Ster Pref.\*5 Ewold 181  
**Kinship:** 16,6%

**General:**

After completing the Short Test Anders 451 was approved in the spring of 2009 on the basis of his good exterior, his outstanding performances in dressage (GP) and his very low kinship bloodline. During his first breeding seasons he was given ample opportunities and within the group of stallions of his year his mares were of average quality (75% of the foals from his first two crops have (at least) a Star dam). The stallion completed the Progeny Test in 2014 based on two crops of (minimum) 3-year-old descendants.

**Exterior:**

**General** The offspring of Anders 451 are slightly deficient in uniformity, have satisfactory breed expression and leave a positive impression, especially in trot. **Breeding type** The offspring of Anders 451 are horses with satisfactory racial type and have heads that are sufficiently expressive. Their necks are somewhat lacking in length and in many cases slightly too horizontal. The horses have satisfactory feathers and have average black coat colour. **Conformation** The offspring of Anders 451 show some variation in terms of conformation. Some of his offspring are youthful, slow-to-mature looking horses in type, whereas others have a more 'classic' build. The horses have satisfactory length of forearm and have a more than satisfactory upward build. They often have slightly steep shoulders but have correct back and loin conformation.

They have correct croup conformation (slightly sloping) showing more than satisfactory length. **Legwork** The stance of the hind legs is correct. Foreleg conformation is correct. The legs are clean and dry with satisfactory feet. **Walk** The walk has satisfactory length of stride and displays more than satisfactory activity. **Trot** They have a roomy trot with a good use of the hind leg which catches the eye. In trot they move with balance and suppleness.

**Sport aptitude:**

**Training report and character:** The Progeny Test for Anders 451 included 20 offspring consisting of seven 4-year-olds and thirteen 3-year-olds, eleven mares and nine stallions/geldings. In order to compete the test in 2014 not all test horses were selected from among inspected horses. Nine non-inspected horses took part in ABFP tests. The scores of all inspected and non-inspected offspring were of a similar level. Anders 451's offspring are calm horses with good stable manners. In use they show good trainability and they have a reliable and relaxed attitude. They concentrate on the job and have more than satisfactory work ethics. **Walk** The walk is sufficiently roomy and displays more than satisfactory activity. Some of the offspring tend to struggle a bit with tact and rhythm, mostly in driven work. **Trot** The trot is sufficiently roomy showing more than satisfactory activity and good forward reach of the hind legs. **Canter** In canter the horses

move with satisfactory engagement but the offspring need to develop a more uphill outline. **Riding horse aptitude** Under saddle the horses demonstrate more than satisfactory activity of the hind leg. Particularly in canter we would like to see a better posture. **Driving horse aptitude** In driven work the horses struggle with the walk. The hind leg demonstrates more than satisfactory activity. In trot the rhythm is often a bit rushed which affects their capacity for self-carriage and suspension. In driven work the horses have little front and posture.

**Conclusion:**

Anders 451's Progeny Test shows a positive outcome for his progenitive qualities in terms of exterior which is mainly reflected in the high percentage of offspring, both mares and stallions, that have become Star. Even though his offspring have done fairly well in ABFP tests, expectations were probably running a bit too high because the stallion had largely been approved on the basis of his own sport performances. It should be noted that Anders 451's slow-to-mature nature is something that he will probably pass on to his foals. His progenitive qualities and his low kinship percentage indicate that Anders 451 is expected to have a positive influence on breeding and therefore his breeding licence will be sustained.

# Reinder 452

**Date of birth:** 27-2-2005  
**Breeder:** A. De Boer, Visvliet  
**Owner:** Tj. Bosma, Kollumerzwaag  
**Lineage:** Aan 416 x Ster Sierk 326 x Ster Ludse 305 x Stb. Wessel 237P (mareline 128)  
**Kinship:** 17,8%

**General:** As a 4-year-old, Reinder 452 was approved in the spring of 2009 on the basis of his satisfactory lineage, his more than satisfactory exterior and his good results in the Central Examination. Reinder 452 has had many opportunities for breeding in terms of numbers, and compared to the other stallions of his year his mares were of average quality (70% of the registered foals from his first two crops have (at least) a Star dam). The stallion completed the Progeny Test in 2014 based on two crops of (minimum) 3-year-old descendants.

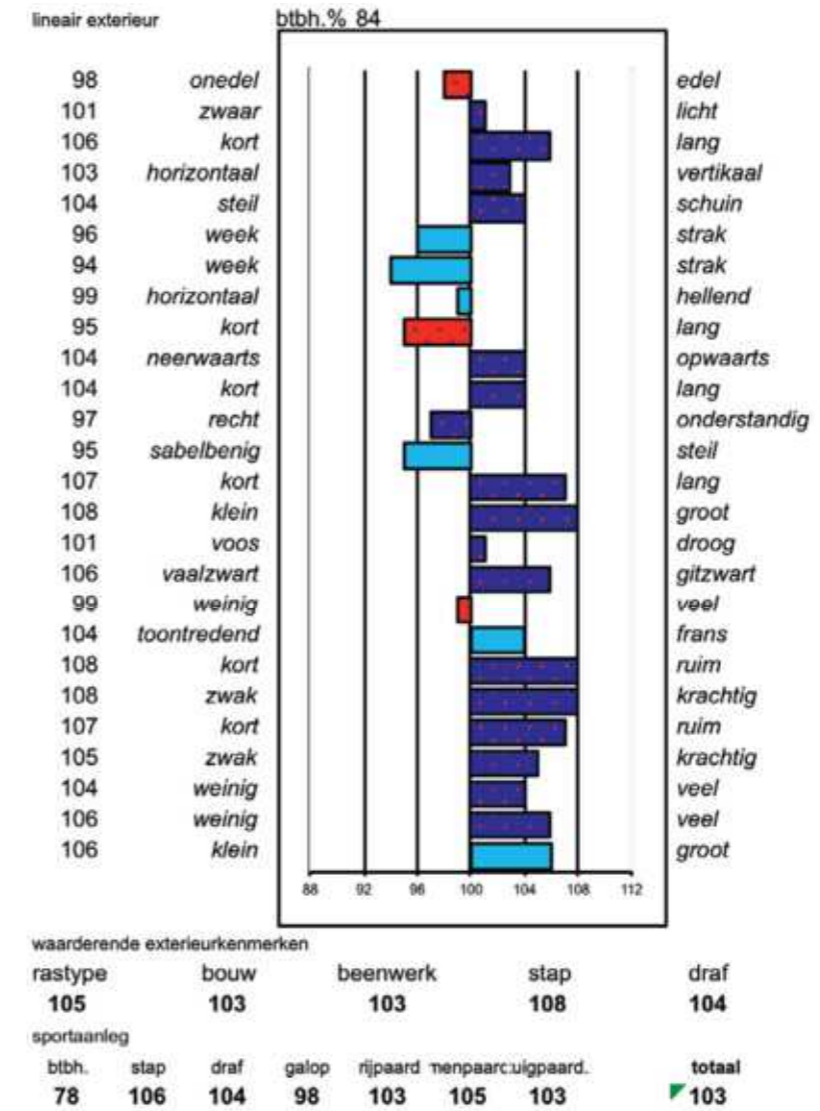

**Exterior:**

**General** The offspring of Reinder 452 are a uniform group of more than satisfactorily developed horses with more than satisfactory breed expression, but often with a remark regarding conformation. **Breeding type** The offspring of Reinder 452 are horses with more than satisfactory breed expression. Many of them would benefit from slightly finer heads. Their necks show good length and vertical build. The horses have a jet black colour and more than satisfactory feathers. **Conformation** The offspring of Reinder 452 are more than satisfactorily developed horses. They show satisfactory length in the foreleg, but their build is generally a bit forward and down. They have correct

shoulder conformation with a good slope. In terms of top line many horses do not have strong connections. They tend to have weak back and loin connections. They lack length of croup but croup conformation is correct (slightly sloping). **Legwork** They tend to have too much length in the hind legs which are sometimes a bit sickle-hocked. The stance of the foreleg is correct and the legs are more than satisfactorily clean and dry with generously shaped feet. **Walk** The walk is roomy showing more than satisfactory activity with hind legs stepping far under the body. **Trot** The trot has a more than satisfactory forward-reaching movement. Generally, the hind leg tends to be lagging behind a bit which influences the carrying capacity of the hind leg and overall balance. The horses are found to have satisfactory suppleness. **Sport aptitude:** **Training report and character:** Reinder 452's Progeny Test included 21 offspring consisting of nine 4-year-olds and twelve 3-year-olds, in total twelve mares and nine stallions. Another stallion has completed the Central Examination. Generally speaking Reinder 452's offspring are pleasing horses that show satisfactory manners when being handled, but they also tend to be a

somewhat variable group. The same applies to the aspect of reliability when being worked. They are all horses with more than satisfactory trainability, usually not easily distracted and showing good work ethics. **Walk** The walk is regular showing more than satisfactory ground-coverage and activity of the hind leg. **Trot** The trot is roomy and the horses move well through the body. Some horses must learn to bring the hind leg more forward under the body. **Canter** The horses canter with powerful strides from engaged hind legs but must develop more carrying capacity and a more uphill outline. **Riding horse aptitude** Under saddle the horses show generous movement with more than satisfactory use of the body. However, the overall picture would benefit from a slightly better posture. **Driving horse aptitude** The horses move with more than satisfactory front but they lack posture. The use of both foreleg and hind leg demonstrates more than satisfactory ground-coverage. In driven work the horses are very eager and forward-going. **Conclusion:** Based on the Progeny Test, Reinder 452 is found to have satisfactory, positive progenitive qualities and therefore his breeding licence will be sustained.

# Sjouke 453

**Date of birth:** 6-5-2005  
**Breeder:** R.H. Veenstra, Surhuizum  
**Owner:** A.P. Both, Voorthuizen  
**Lineage:** Doaitsen 420 x Ster Jelte 365 x Ster Pref.\*4 Leffert 306 x Stb. Gerlof 294 (mareline 214)  
**Kinship:** 16,9%

## General:

As a 4-year-old, Sjouke 453 was approved in the spring of 2009 on the basis of his more than satisfactory lineage, his more than satisfactory exterior and his good results in the Central Examination. In terms of numbers he had many opportunities for breeding during his first stud seasons, and compared to the other stallions of his year his mares were of below average quality (56% of the foals from his first two crops had a Star dam). Sjouke 453 completed the Progeny Test in 2014 based on two crops of (minimum) 3-year-old descendants.

## Exterior:

**General** Sjouke 453's offspring are found to be a satisfactory group of uniform, fairly heavy horses with a 'classic' build. They have correct legwork but in many cases get a remark for the walk. **Breeding type** Sjouke 453's offspring are horses that are often found to lack breed expression. The heads are not overly expressive and appear to be a bit heavy. Their necks lack length and are heavy, many individuals have an upside down neck. Their neck conformation shows more than satisfactory vertical build. Their black coat colour has a somewhat dull shine to it and they have more than satisfactory feathers. **Conformation** Sjouke 453's offspring show satisfactory development and are a bit short-legged with a heavy build. Because of the heavy head-neck connection and lack of length the necks are functionally

deficient. The foreleg does not have enough length which produces a downward build. Shoulder conformation is often found to be a bit too steep. The horses have a correct top line with satisfactory length of the croup. The croup has too much slope. **Legwork** Stance of the hind leg and movement of the foreleg are correct. The legwork is a fraction too heavy but shows satisfactory quality. Shape of the feet is satisfactory. **Walk** In walk the horses often struggle with tact. The walk lacks scope of movement and activity from the hind leg. **Trot** In trot they demonstrate more than satisfactory scope of movement and power. In trot they move with satisfactory balance and suppleness.

## Sport aptitude:

**Training report and character:** VSjouke 453's Progeny Test included 18 offspring consisting of eight 4-year-olds and ten 3-year-olds, in total twelve mares and six stallions. Only three offspring were selected from inspected horses. This fact is thought to have influenced the overall average result in a negative way. Sjouke 453's offspring are all pleasing horses with more than satisfactory stable manners. In work the horses show more than satisfactory reliability but in some cases they have a tendency to become somewhat anxious. They have a more than satisfactory attitude to work, but due to their heavy, short necks and their heavy head-neck connections they are not easy to train.

**Walk** The walk lacks scope of movement and often tact and rhythm as well. **Trot** The trot has a more than satisfactory forward-reaching movement. The hind leg is often a bit slow and lacks carrying capacity. **Canter** In canter the horses demonstrate little engagement from the hind legs and self-carriage and often show little upward lift. **Riding horse aptitude** Under saddle the horses demonstrate less than satisfactory use of the hind leg demonstrating little suppleness and balance. Because of their fairly short and heavy necks these horses are not easy to train. **Driving horse aptitude** In driven work the horses have little self-carriage and posture.

## Conclusion:

The results of Sjouke 453's offspring in inspections and tests are rather moderate. It must be considered however, that the stallion was paired to mares of lower quality and that there were hardly any inspected offspring available for ABFP tests. A slightly more favourable picture emerges for the expectation of breeding values because this has been adjusted to compensate for the quality of the offspring's dams. Nevertheless, it must be concluded that the stallion is not expected to have progenitive qualities in terms of enhancing exterior and sport aptitude. Because the progenitive qualities are not found to be evidently negative the stallion's breeding licence will be sustained.

# Tsjalle 454

**Date of birth:** 2-3-2006  
**Breeder:** G. Wijbenga-Meijer, Veenwouden  
**Owner:** A. Okkema, Siegerswoude  
**Lineage:** Mintse 384 x Ster Brandus 345 x Ster Pref.\*9 Jurjen 303 x Ster Pref.\*4 Jillis 301 (mareline 70)  
**Kinship:** 18,4%

## General:

As a 3-year-old, Tsjalle 454 was approved in the autumn of 2009 on the basis of his good lineage, his good exterior and his very good results in the Central Examination. In terms of numbers he was given lots of opportunities for breeding and paired to mares of more than average quality (89% of his registered foals from the first crop have (at least) a Star dam). Tsjalle 454 completed the Progeny Test in 2014 based on one crop of (minimum) 3-year-old descendants.

## Exterior:

**General** Tsjalle 454's offspring are a uniform group of horses showing breed expression and a harmonious build who should develop longer strides in walk but who demonstrate an excellent trot.

**Breeding type** Tsjalle 454's offspring are attractive and true-to type horses with beautiful, expressive heads. They have long and vertically placed necks. They have more than satisfactory feathers but a somewhat faded black coat colour.

**Conformation** Tsjalle 454's offspring are horses with satisfactory development and a harmonious build. We would like to see slightly more length in the (fore)leg and a more upward build. Slope of the shoulder is more than satisfactory. Their backs show satisfactory strength with good back-

loin-croup connections. The croups could be a bit longer and are often found to have too much slope.

**Legwork** The stance of the hind legs is correct. The foreleg often has a tendency to toeing-in. The legwork radiates quality and has generously shaped feet.

**Walk** In walk they should develop longer strides. The hind leg displays more than satisfactory activity in walk.

**Trot** The horses trot with long, roomy strides demonstrating much self-carriage and a powerful use of the hind leg which results in much balance and suppleness.

## Sport aptitude:

**Training report and character:** Tsjalle 454's Progeny Test included 18 offspring, all of them 3-year-olds, in total eight mares and ten stallions. Another two stallions have completed the Central Examination (one of them the approved Jehannes 484). Tsjalle 454's offspring all have very good stable manners. In work they are found to be reliable horses but they also show above-average sensitivity and some tend to be a little anxious when worked. They respond well to the aids and have more than satisfactory trainability. When working they display good work ethics with above-average stamina.

**Walk** Both under saddle and in driven work the walk is short. The hind leg

displays more than satisfactory activity in walk. Some offspring are found to tense up in walk and therefore struggle with tact and regularity. **Trot** In trot they demonstrate a lot of activity and a good locomotive technique. However, their movement is often a bit rushed and needs more length of stride. In trot they are still struggling a bit with suppleness and the ability to extend their strides. **Canter** They strike off in canter with surprising ease. They display good-quality strides, a lot of suppleness and a fine uphill outline.

**Riding horse aptitude** The performance tests reveal that some of the horses build up too much tension, which is why they show a rushed rhythm in walk and trot. The horses are found to have a remarkably good canter. Under saddle they demonstrate good posture and balance.

**Driving horse aptitude** In driven work the horses have a lot of front and posture with an active and carrying hind leg. The horses must develop a better moment of suspension. The foreleg displays a lot of knee action.

## Conclusion:

Tsjalle is found to have very positive progenitive qualities for exterior and also positive progenitive qualities for sport aptitude and therefore his breeding licence will be sustained.
