

Stallion Information

February 2017

Stallion Information 2017

This 2017 Stallion Information is being presented to you as an aid in choosing a stallion. When choosing a stallion it is not just important to use the best-quality stallions but it is even more important to make the correct combinations. The KFPS strives to make as many breeding data on its stallions available as possible.

Which stallions?

In the 2017 edition of Stallion Information all active stallions are displayed. For exterior, by viewing the results, the young stallion's offspring information is still not included. These breeding values are based on breeding pedigree data and the exterior assessment (linear score) of the stallion itself. For stallions that the offspring have gone through, the results are almost entirely based on test data (linear score) of offspring. The reliability of the results of young stallions is still low. This means that the results can change more (as descendants are inspected) than the older stallions with a high reliability. By the lower reliability of the results of younger stallions, these cautious estimates and are closer to the breed average (100).

Which characteristics?

The following characteristics of the stallions are included:

1. Breeding value linear exterior characteristics
2. Breeding values for sport aptitude

Breeding values exterior and sport aptitude

Given the complexity of the breeding-value estimation for the exterior characteristics and sport aptitude an explanation of the origins and the interpretation of the numbers is necessary. In this explanation we also touch upon how the numbers can be used for choosing a stallion.

The linear characteristics

The breeding values for the exterior characteristics are based on the linear scores, which since 1993 are documented for every studbook registration of the horses. Of the 25 exterior characteristics a score is given between 5 and 45, with an average of 25. For the linear characteristics it specifically concerns an observation and not a rating. The characteristics have been chosen such that the linear report provides a picture of the horse's exterior that is as complete as possible. The linear characteristics can be divided in two categories:

The optimal characteristics: the characteristics for which the average score (25) or breeding value (100) is most desired.

Examples of such characteristics are: shape of the back, conformation of the front legs, and shape of the hind legs.

Maximum characteristics: the characteristics for which goes the higher the better (example: expression of the face, expression of movement, etc.) or characteristics of which the optimum lies clearly above average, such as slope of the shoulder and shape of

the croup. The difference has been visualized by depicting the breeding values for the maximum characteristics with dark-blue bars (favorable) and red bars (unfavorable), and the breeding values for the optimum characteristics with light-blue bars. In addition to the 25 linear characteristics the overview consists of a measured characteristic: the height at the withers.

The rated characteristics

In addition to the 25 linear exterior characteristics also five rated characteristics are scored: breed type, build, legs, walk, and trot. For the linear characteristics it concerns a descriptive value, for the rated characteristics it concerns a rating. When evaluating the rated exterior characteristics the related linear characteristics play an important role. In addition non-linear scored segments can play a role. The characteristic trot, e.g., consists in addition to the linear characteristics length of the trot, strength of the trot, balance, and suppleness also of, e.g., rhythm/regularity of the trot. The rated characteristics are scored from 4 through 9. Since 2016, the marks for the rating characteristics scored in upgrading procedures are included in the breeding value assessment.

Sport aptitude

The breeding values are based on the ABFP results as these have been gathered by KFPS over the years, also as part of the testing on offspring. The reasons that this particular data is used for the breeding-value estimation instead of, e.g. sport results are the following:

1. ABFP information is available much earlier than sport data.
2. ABFP data is for a larger part hereditary (higher h²) than sport data. That is thanks to the uniform training, presentation, and evaluation.
3. Number of offspring per stallion in sport is in general (still) too low.
4. The ABFP data gives information on segments (basic gaits, suitability as show-driving horses, riding horses, and driving horses).

Since the breeding value assessment of December 2015 all ABFP data as well as the IBOP data are included in the breeding value assessment.

The estimation model

The breeding values, estimated by CRV / Dutch Cattle Syndicate, are estimated with a so-called estimation model. This estimation model indicates for which influences the differences between (in this case) stallions are corrected. The exterior scores are

corrected for the following effects: breeding value of the dam of the offspring, age at the time of inspection, gender, linear evaluator, and inspection. This correction takes place to get an insight as pure as possible in to what degree the differences in offspring groups are caused by difference in genetic aptitude of the stallions. With these correction factors it basically does not matter in what area or on what mares a certain stallion is used. The kind of evaluation model that is being used is the so-called animal model. With an animal model in addition to data on offspring also information of family members is included. The contribution of this information declines as more information on the offspring becomes available.

Interpretation of the breeding values

The breeding values are indicated in an average of 100 with a spread of 4 points. This basis was determined in 2001. The average breeding values of all horses born in 2001 is for each characteristic set at 100 and the spread (standard deviation) of these breeding values is set at 4. Breeding values with a deviation compared to 100 of one time the spread (between 96 and 104) have to be considered as average. Over two thirds of the breeding values are in this margin. It goes without saying that the larger the deviation is compared to 100, the larger the expected effect is. A stallion with a breeding value of 109 or higher for, e.g., strength of movement, belongs to the 2% best stallions of the population. For a breeding value higher than 112 this is 0.1%.

Reliability of the Breeding values

The breeding values are indicated per characteristic with 'bars.' As mentioned the maximum characteristics are indicated by dark-blue bars (favorable) and red bars (unfavorable) and the optimal characteristics by light-blue bars. For the maximum characteristics goes that results to the left are unfavorable (red) and results to the right are favorable (dark-blue). For the optimal characteristics goes that (extreme) results to both the left and right are unfavorable; 100 is optimal here. Summarized: Bars to the left are always unfavorable and bars to the right are favorable, except for the light blue bars.

Reliability

The degree to which the breeding value provides a precise image of the actual genetic aptitude of a stallion is expressed in the reliability (betrouwbaarheid / btbh.). The reliability is especially influenced by the number of inspected offspring. With a low reliability the breeding values can still change considerably when more offspring are inspected. The reliability can be interpreted as followed:

Reliability	Interpretation
Less than 70%	moderately reliable
70-80%	reasonably reliable
80-90%	reliable
Over 90%	very reliable

Use of the breeding values

The exterior breeding values are an excellent aid for making a correct mare-stallion combination. This can be done by looking at the mare's linear score form for the items that can be considered for correction. If the characteristic that needs to be corrected is a maximum characteristic then a stallion needs to be selected that has a (clearly) positive hereditary effect on this characteristic (bar to the right). If it concerns an optimal characteristic then the best choice is a stallion with an average breeding value or a slight deviation in the opposite direction, depending on the score of the mare. Use of the breeding values for sport aptitude. As you can see breeding values have been estimated for the basic gaits in the exterior bar and in the sport aptitude bar. The former is based on the evaluation of the basic gaits in the inspection ring (in hand), while the latter is based on the evaluation of the basic gaits in use (ABFP test). For most of the stallions these breeding values largely match. There are, however, stallions that have a breeding value for the basic gaits in the sport index that is quite a bit lower than the breeding value for the basic gaits in the exterior bar. Given the fact that the breeding goal indicates that we want to breed horses that have good gaits in especially their use the breeding values for sport aptitude should weight more heavily in your evaluation of the stallions.

Kinship percentage

All Studbook stallions are given a rating for kinship percentage. This figure reflects a stallion's kinship to the population as a whole. The lower this percentage, the more such a stallion can contribute to out-crossing. The average percentage of Studbook stallions lies around 17.5%. The kinship percentage is calculated by computing the inbreeding coefficient of fictitious foals from the combinations of all individual stallions with the mare population. The mare population is in fact defined as all fillies that were born over the past three years, 8000 individuals in total. For the calculation of inbreeding all known generations are considered (instead of only the first 5 generations). The kinship percentage is influenced by the degree in which bloodlines correspond with or deviate from the population. The kinship percentage will increase in proportion to the degree in which a particular stallion is used. The kinship percentage is one of the aspects which are considered for the selection of young stallions to restrict the increase of inbreeding. In the calculations of kinship percentages in this issue a correction for missing pedigree information has been applied for the first time. Therefore the kinship percentage of stallions with a 'short dam line' has been revised upwards.

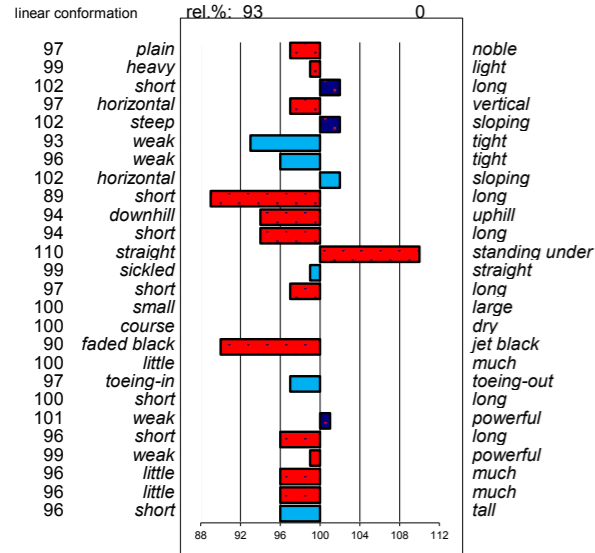

Stallion information online

On the KFPS website (www.kfps.nl) you also find the digital version of the Stallion Information. You can find it under the heading 'Breeding information' or 'My Horse' and here you will find even more detailed information about the stallions. In addition, you can make stallion selections by indicating selection criteria. In the digital version of the Stallion Information all Stallions are included.

List of KFPS Studbook Stallions 2017

Below are the studbook stallions with a breeding permit stationed in the Netherlands for 2017.

Name stallion	Station	
Ulke 338	Dekstation Gaasterland, Oudemirdum	S.W.S. Tel.: +31 (0)514-572111/604111
Abe 346	Tj. Bosma, Kollumerzwaag	S.W.S. Tel.: +31 (0)511-444820
Fabe 348	Stal Wijdewormer, Kwadijk	S.W.S. Tel.: +31 (0)299-439443
Fêde 350	P. Kruidenier, Rhoon	Nat. Dek Tel.: +31 (0)180-620051
Jasper 366	Ancilla Bruggink, Hoornsterzwaag	S.W.S. Tel.: +31 (0)6-51923992
Ielke 382	O.L. en M.C. v.d. Weide, Ansen	S.W.S. Tel.: +31 (0)522-470405 /+31 (0)6-53751411
Rik 396	Opfok en Handelsstal Tj. Bouma, Terkaple	S.W.S. Tel.: +31 (0)566-689741
Tsjalke 397	G. Toonen, Maren-Kessel	S.W.S. Tel.: +31 (0)412-479242
Wikke 404	De Nieuwe Heuvel, Lunteren	S.W.S. Tel.: +31 (0)318-483284
Rindert 406	Dekstation de Terpen, Wommels	S.W.S. Tel.: +31 (0)515-332505
Beart 411	Gebr. van Manen, Ede	S.W.S. Tel.: +31 (0)318-513371
Bente 412	M. Schreven, Weert	S.W.S. Tel.: 06-20399084
Aan 416	Tj. Bosma, Kollumerzwaag	S.W.S. Tel.: +31 (0)511-444820
Eibert 419	O.L. en M.C. v.d. Weide, Ansen	S.W.S. Tel.: +31 (0)522-470405 /+31 (0)6-53751411
Felle 422	O.L. en M.C. v.d. Weide, Ansen	S.W.S. Tel.: +31 (0)522-470405 /+31 (0)6-53751411
Haitse 425	Stal de Oergong, Huins	S.W.S. Tel.: +31 (0)6-20005570 /+31 (0)6-51032888
Gjalt 426	Stal Wijdewormer, Kwadijk	S.W.S. Tel.: +31 (0)299-439443
Jorn 430	Hestegaarden, Beek en Donk	S.W.S. Tel.: +31 (0)492-462396
Loadewyk 431	Dekstation De Holm, Zevenhuizen	S.W.S. Tel.: +31 (0)594-632247 /+31 (0)6-51230975
Jense 432	Tj. Bosma, Kollumerzwaag	S.W.S. Tel.: +31 (0)511-444820
Maurits 437	Gebr. van Manen, Ede	S.W.S. Tel.: +31 (0)318-513371
Mewes 438	Dekstation Gaasterland, Oudemirdum	S.W.S. Tel.: +31 (0)514-572111 /+31 (0)514-604111
Maeije 440	Tj. Bosma, Kollumerzwaag	S.W.S. Tel.: +31 (0)511-444820
Michiel 442	Fam. J.A.M. Kruis, Heeg	S.W.S. Tel.: +31 (0)6-46234423
Olgert 445	Stal Wijdewormer, Kwadijk	S.W.S. Tel.: +31 (0)299-439443

EU Stations in the Netherlands

* The list is final until the end of March. When there become new stallion stations, then this list will be updated on www.kfps.nl

* It is possible that certain stallions have frozen semen according to the EU rules. Notify always at the stations for the possibilities.

Carrier status

For stallions approved in and after 2014 the results of dwarfism- and hydrocephaly DNA tests will be published. Stallions that have been tested positive for either of these disorders can only be used for mares that are free of the same disorder. In case of older (not tested) stallions breeders must consult with the stallion keeper. If both mare and stallion have been tested positive for the same disorder then stallion keepers will advise against a pairing between these two horses. Applications for DNA testing of mares can be handed in to the KFPS. If requested a hair sample from the KFPS archive can be used to this end.

List of KFPS Studbook Stallions 2017 Foreign Country

U.S.A. / CANADA

Studbook Stallions

Name stallion	Station
Anton 343	Anton 343 LLC, Houstonville
Maiko 373	Sable Ranch LLC, Gomer GA

Elias 494

Lineage: Jorn 430 x Crown Sport Maiko 373 x Star Thomas 327 x Vb Tsjerk 328
Date of birth: 19 March 2009 **Height:** 1,72 m
Pedigree: 109 **Kinship:** 17,0% (average)

Exterior:

Breeding type: Djorn van de Demro Stables is a stallion with abundant breeding type who radiates elegance. He has a very expressive head and a well-shaped though somewhat heavy neck which has satisfactory vertical build. Djorn van de Demro Stables has copious feathers and black coat colour.

Conformation: Djorn van de Demro Stables has correct conformation and a very good rectangular build. He is long-lined and body shape is horizontal. The top line shows strong connections with a sloping shoulder. He has a very long, correctly positioned croup.

Legwork: The legwork shows satisfactory quality. The foreleg is hollow, slightly narrow between the knees and stance of the forelegs, in particular the left, is toeing-out. The hind leg is well-shaped and dryness is satisfactory. The feet are a bit small in size.

DNA-tests:

Hydrocephaly: non-carrier
Dwarfism: non-carrier
Chesnut factor: non-carrier

Estimated breeding value exterior:

Reliability	43%

Performance Test:

The stallion has been selected for the Performance test on the basis of his performances in the sport. With scores exceeding 70% in the Light Tour Djorn van de Demro Stables is very capable of holding his own in top national dressage. The Stallion Inspection Committee has observed him in the sport on two occasions. His exterior assessment took place on 4th of October 2016.

Character assessment:

The Short Test took place at the KNHS Centre in Ermelo from 23rd of November till 10th of December 2016. **Stable manners:** Djorn van de Demro Stables has friendly, calm and attentive stable manners. **Work ethics:** Djorn van de Demro Stables is an obedient stallion with great work ethics, lots of forward-go and good workability. The work comes easy to him.

Assessment of guest rider: Regularity of the walk is satisfactory showing satisfactory ground-coverage and more than satisfactory use of the body. The trot is powerful with rhythm and good suppleness. Djorn van de Demro Stables demonstrates a powerful hind leg which he places under the body with much flexion in the hock. He shows a lot of shoulder freedom and his foreleg is generously placed forward. He has good capacity for transiti-

ons in all paces. The canter is uphill with a very good carrying hind leg. Djorn van de Demro Stables transfers his weight onto the hindquarters with ease. He effortlessly completes all parts of the test and flying changes come natural to him. Djorn van de Demro Stables is exceptionally talented for top dressage levels.

Final conclusion:

- At a relatively young age Djorn has qualified for the Short Test on the basis of significant results in dressage.
- He has completed the character assessment with positive results.
- Djorn has a very good exterior and radiates breeding type.
- Djorn has satisfactory lineage with a high-quality dam.
- He makes a very good impression in work, more than living up to the expectations of his talent for top dressage.

On the basis of these findings Djorn van de Demro Stables will be registered in the Studbook under the name of **Elias 494**.

Dam report:

General: Dam to Elias 494 is the 12-year-old Crown and Sport mare Maaïke Brechtsje D. This mare radiates breed expression and is a Maiko 373 daughter. She has an

expressive head and satisfactory length in the neck. Her conformation lacks a little bit of strength in the back but she has a very strong loin section with a long, lightly sloping croup. She has satisfactory, correct conformation of legs which are also remarkably dry. She walks with tact but would benefit from more reach in front. In spite of being heavily in foal at the time of inspection her trot demonstrates power and scope with the hind leg placed far under the body showing good use of the hock.

Dam line: Not just the combination sire x maternal sire, Jorn 430 x Maiko 373, but also the dam line (pedigree 109) should preferentially be a bit stronger for an approved stallion. An extra asset for Maaïke Brechtsje D. is the fact that in addition to the Sport predicate she has completed a fine IBOP.

Advice:

Elias 494 can serve to establish attitude and qualities for dressage in breeding, such as use of the hind leg, talent for piaffe and passage as well as canter. He is also expected to have a positive influence on the breed characteristics feathers, type and noble heads. He should be paired to mares with correct foreleg conformation and with good length of stride in walk.

Jurre 495

Lineage: Maurits 437 x Star Jasper 366 x Star Teunis 332 x Star Pref*4 Oege 267
Date of birth: 7 May 2011 **Height:** 1,69 m
Pedigree: 25 **Kinship:** 17,7% (average)

Exterior:

Breeding type: Jorbert fan 'e Süderleane is a modern, true-to-breed stallion. His head has more than satisfactory expression. He has a long neck with a vertical build. Jorbert fan 'e Süderleane flaunts lots of feathers and has black coat colour.

Conformation: Jorbert fan 'e Süderleane is a long-lined stallion with correct conformation but shoulder conformation is a bit steep. Jorbert fan 'e Süderleane has a strong back with a wide and well-developed loin section. Croup conformation is correct with good length. He has an uphill frame. **Legwork:** Quality of legwork is satisfactory although a bit toeing out in the foreleg. Hock conformation in the hind leg is a little small-angled. Development of Jorbert fan 'e Süderleane's feet is more than satisfactory.

DNA-tests: Hydrocephaly: carrier
Dwarfism: non-carrier
Chestnut factor: non-carrier

Performance Test:

Training report: Jorbert fan 'e Süderleane is a friendly and attentive stallion who has already competed successfully in show driving. During the test he caught the eye with his good control of

all three disciplines. He has a natural self-carriage, lots of front and good use of the hind leg. In the course of the test Jorbert fan 'e Süderleane has developed better use of the top line. The drivers and riders all praised his willingness to work, work ethics and described Jorbert fan 'e Süderleane as a stallion with a lot of forward-go who is a pleasure to ride.

Walk: His walk is sound, active, powerful and with satisfactory length of stride. He would benefit from a bit more reach in front of the foreleg. **Trot:** He has a powerful trot with satisfactory length of stride displaying more than satisfactory use of the body and a lot of front. A positive asset in trot is his powerful use of the hind leg. Jorbert fan 'e Süderleane should move with a little more shoulder freedom in trot. **Canter:** He has a sound canter with very good uphill movement and good engagement of the hind legs that are placed far under the body. In canter Jorbert fan 'e Süderleane shows good capacity for transitions and moves with good self-carriage.

Riding horse aptitude:

Jorbert has a lot of talent for dressage work giving his rider a very good feeling.

Driving horse aptitude:

Jorbert fan 'e Süderleane has good aptitude for driving. He is a pleasure to drive, works with great gusto and has very good trainability. For show driving Jorbert fan 'e Süderleane is very talented. He moves with a very good posture and a lot of front. He gives his driver a very good feeling and he has very good trainability skills, showing a lot of forward-go in show driving.

Findings Performance Test:

In the course of the test Jorbert fan 'e Süderleane has shown much progress and can be described as an all-round horse. He has successfully mastered all three disciplines. He is a hard-working horse who is very happy in his work.

Final conclusion:

Jorbert fan 'e Süderleane has a very good lineage, a good exterior and has completed a good Performance Test in all three

disciplines. On the basis of these findings he will be registered in the Stallion Studbook under the name of **Jurre 495**.

Dam report:

General: Jurre 495's dam is the 10-year-old Star mare Teatske L. who is a Jasper 366 daughter with good breeding type and satisfactory expressiveness of the head and neck length. The mare's build shows a sloping shoulder, strong top line with a wide loin section and correct croup conformation with satisfactory length. Her youthful appearance catches the eye. The mare has correct, high-quality legwork. The walk has satisfactory length of stride and displays satisfactory activity. In trot this mare moves with much use of the body, demonstrating a powerful and active hind leg combined with good posture.

Dam line: Teatske L. is a first premium Star mare by Jasper 366 and stems from a dam line known for its good breeding qualities (pedigree 25). Up till now she has 5 known offspring including a Crown mare (by Thorben 466) who has scored 78 points in the ABFP Test. The dam is a Star mare by Teunis 332 and the granddam is a first premium Star Preferent Oege 267 mare who had 4 Star offspring including one with the Sport predicate.

Advice:

Jurre 495 is a good match for mares that need to develop work ethics, croup length and self-carriage. He can have a positive influence on use of the hind leg. Mares need to have non-carrier status for hydrocephaly.

Menne 496

Lineage: Norbert 444 x Star Pref*5 Beart 411 x Star Pref*4 Nykle 309 x Star Pref*9 Prest Tsjalling 235
Date of birth: 17 March 2012 **Height:** 1,69 m
Pedigree: 28 **Kinship:** 17,9% (average)

Exterior:

Breeding type: Menno fan Oostenburg is a stallion with a youthful appearance who combines satisfactory breeding type with an attractive outline. His head shows satisfactory expressiveness and his long and well-shaped neck is a bit horizontal. Menno fan Oostenburg has satisfactory feathers and coat colour is black. **Conformation:** Menno has a fine appearance standing in a very correct model. He is a long-lined stallion with strong connections in his top line. He has an uphill body shape with a long, sloping shoulder. He has a long, correctly positioned croup.

Legwork: The legwork radiates quality. He has long forelegs with correct conformation. The hind leg is sickle-hocked and stance is slightly cow-hocked as well. He has well-shaped feet.

DNA-tests: Hydrocephaly: non-carrier
Dwarfism: non-carrier
Chestnut factor: non-carrier

Performance Test:

Training report: Menno fan Oostenburg has made good progress in the course of the test and is a friendly and attentive

stallion. At the start Menno fan Oostenburg struggled a bit with use of the body but he demonstrates satisfactory willingness to work and responds well to aids. Menno fan Oostenburg moves effortlessly with good ground-coverage. In all three disciplines he must develop a more uphill outline and more engagement of the hindquarters. In the riding test his capability in canter catches the eye. **Walk:** The walk shows satisfactory room and activity. Menno fan Oostenburg needs to develop his use of the body. **Trot:** The trot is roomy and powerful but the hind leg should be placed forward under the body with a fraction more alacrity. Menno fan Oostenburg must learn to trot in a more uphill frame with increased suppleness. In the course of the test however, he has shown constant progress. **Canter:** The canter is uphill with a lot of scope. The hind leg is placed far under the body with good engagement and carrying capacity. Menno fan Oostenburg demonstrates good talent for transitions in canter.

Riding horse aptitude:

Menno fan Oostenburg is found to have great riding horse aptitude and his qualities in canter are a positive feature. He would benefit from slightly more use of the body and a more uphill frame in trot.

Driving horse aptitude:

Menno fan Oostenburg has much talent for driven work. He has good, ground-covering movement and is easy to train. He has satisfactory self-carriage but needs to move in a more uphill outline. Menno fan Oostenburg has more than satisfactory aptitude for show driving work. In this discipline he displays more front and more elevation and moves with satisfactory forward activity. The hind leg should be placed under the body with more

alacrity. In the foreleg we see good knee action combined with good reach in front.

Test results riding test:

Total	78.5

Findings Performance Test:

Menno fan Oostenburg is found to have good aptitude for dressage and driven work and more than satisfactory aptitude for show driving work. He displays more than satisfactory willingness to work and trainability is good.

Final conclusion:

Menno stems from a good mare line and has a very good exterior. He has demonstrated good aptitude as a dressage- and driving horse with more than satisfactory

aptitude for show driving work. He can be described as an all-round horse. On the basis of these findings Menno fan Oostenburg will be registered in the Stallion Studbook under the name of **Menne 496**.

Dam report:

General: Menne 496's dam is the 12-year-old first premium mare Nynke fan 't Skânswyke. She is a Beart 411 daughter with good conformation, a sloping shoulder, strong back and loin section. The croup shows satisfactory length with average conformation. She has a horizontal body shape. She has kept her youngish appearance but lacks a bit of breeding type. Her long neck is fairly horizontal and she is slightly lacking in expressiveness of the head. Quality of legwork is more than satisfactory. The walk is roomy and powerful. She trots with strong use of the hind leg, much suppleness and good capacity for transitions. The foreleg would benefit from a bit more reach in front.

Dam line: Nynke fan 't Skânswyke stems from a predicate-rich mare line from pedigree 28. She accumulated 82 points in the IBOP Test, rose to Preferent at a young age and at present has five Star offspring. The granddam (by Nykle 309) is also a Preferent first premium Star mare with 13 offspring including two with the Preferent predicate. She is a full sister of the Grand Prix stallion Ielke 382 and stems from the famous Preferent Performance mare Imkje.

Advice:

Menne 496 is expected to enhance posture, movement and model. He can improve aptitude for canter in dressage. He should be paired to mares with satisfactory breeding type (feathers).

Mees 497

Lineage: Tymon 456 x Star Dries 421 x Star Pref*5 Oltman 317 x Star Jakob 302
Date of birth: 10 April 2012 **Height:** 1,72 m
Pedigree: 11 **Kinship:** 17,4% (average)

Exterior:

Breeding type: Mees van Rijnwoude has abundant breeding type and on account of his magnificent forehead he has a stately appearance. He has an expressive head with fine, vivid eyes. His well-shaped neck has length and is a bit horizontal. Mees van Rijnwoude flaunts rich feathers and has jet black coat colour.

Conformation: Mees van Rijnwoude is a slightly massive stallion but with satisfactory, correct conformation. Positive aspects are his long, sloping shoulder and his long neck. The stallion is hollow-backed with a strong and wide loin section. He has a very long, correctly positioned croup. He has a horizontal body shape. **Legwork:** The legwork shows satisfactory quality although a bit toeing out in the foreleg. The slightly sickle-hocked hind leg is lacking some quality. Development of the feet is good.

DNA-tests: Hydrocephaly: non-carrier
Dwarfism: non-carrier
Chestnut factor: non-carrier

Veterinary:

Performance Test:

Training report: Mees van Rijnwoude has shown a positive development in the course of the examination. He moves with much suppleness and shoulder freedom. In work he shows good self-carriage. The hind leg should be placed under the body with more alacrity but shows improvement with training. Riders and drivers have described Mees van Rijnwoude as a stallion with a very good attitude to work. He demonstrates huge eagerness when working. **Walk:** The walk is regular, with length of stride and he moves well through the body. **Trot:** Mees van Rijnwoude trots with great use of the body and lots of balance while keeping a very good posture. He displays remarkable shoulder freedom with ample forward reach in the foreleg. The hind leg is a little bit slow and should be placed under the body with more activity. Mees van Rijnwoude has shown good trainability in the use of his hind leg. **Canter:** Mees van Rijnwoude is still lacking a bit of scope in canter. He has shown to be very responsive to the canter training and demonstrates fine self-carriage with good balance. The canter displays satisfactory uphill quality.

Riding horse aptitude:

Mees is very talented for dressage work. He moves with natural balance and good posture. Thanks to his good trainability, work ethics and hard-working attitude he gives his rider a very good feeling.

Driving horse aptitude:

Thanks to his good self-carriage, very appealing front, natural balance and spacious movement with long moments of suspension Mees van Rijnwoude is very talented for driven work. He is found to

have good trainability in work. Mees van Rijnwoude also has much talent for show driving work. He moves with more than satisfactory front and good self-carriage. In this discipline he must learn to move a bit more off the hind leg in a more uphill outline. Mees van Rijnwoude also shows good trainability for this discipline.

Findings Performance Test:

Mees van Rijnwoude has shown good progress in all three disciplines and has completed a good test demonstrating great willingness to work.

Final conclusion:

Mees van Rijnwoude is a stallion with more than satisfactory lineage, a more than satisfactory exterior, flaunting great breeding type and good results in all three disciplines. On the basis of these findings he will be registered in the Stallion Studbook under the name of **Mees 497**.

Dam report:

General: Dam to Mees 497 is the 10-year-old true-to breeding type Star mare Tjitske van Rijnwoude (Dries 421) who has an expressive head and a light head-neck connection. The neck has satisfactory length but should be more vertical in build. She has satisfactory slope in the shoulders and satisfactory strength in the somewhat long top line combined with a long, lightly sloping croup. She scores satisfactory for correct leg conformation and dry legwork. She has an active walk moving well through her body. The trot has power and satisfactory ground-coverage. In movement the mare is lacking a bit in shoulder freedom. She is still actively competing in the sport.

Dam line: Tjitske van Rijnwoude comes from a dam line (pedigree 11) which has done well in breeding. Granddam is a Star Pref*5 mare by Oltman 317 and next in the dam line we come across a first premium Star mare by Jakob 302 and the Star Pref*5 Wendelmoed (Marko 262) with 17 offspring.

Advice:

Mees 497 is expected to positively enhance breeding type, work ethics, suppleness, shoulder freedom and posture. He should preferentially be paired to mares with a strong, satisfactory top line who move with an active hind leg.

Rommert 498

Lineage: Norbert 444 x Star Pref*4 Jasper 366 x Star Oege 267 x Star Pref*4 Naen 264
Date of birth: 22 April 2013 **Height:** 1,72 m
Pedigree: 70 **Kinship:** 18,0% (above average)

Exterior:

Breeding type: Rick van de Noeste Hoeve is a stallion who radiates breeding type. His head shows satisfactory expressiveness and his well-shaped neck has satisfactory vertical build. Rick van de Noeste Hoeve has more than satisfactory feathers and coat colour is black.

Conformation: Rick van de Noeste Hoeve is a long-lined, youthful stallion with strong connections in his top line. Shoulder conformation is long with satisfactory slope. He has a long, lightly sloping croup. His body shape is downhill.

Legwork: The legwork shows satisfactory quality. Stance of the foreleg is a little hollow as well as slightly toeing-out. The hind leg is somewhat sickle-hocked but radiates more than satisfactory quality. Size of the feet is generous.

DNA-tests: Hydrocephaly: non-carrier
Dwarfism: non-carrier
Chestnut factor: non-carrier

Veterinary:

Side remark X-ray testing: fetlock joint Near Hind/Off Hind: OC (Osteochondrosis), grade D.

Estimated breeding value exterior:

Performance Test:

Training report: Rick van de Noeste Hoeve was nicely trained when he arrived and has shown good progress in the course of the test and has developed better use of his body. In all disciplines his good leg technique has caught the eye. In addition to his positive attitude and willingness to work the riders and drivers all expressed special praise for his strong use of the hind leg. He is easy to train and has good capacity for working in a closed outline and extending his strides. He needs to develop a more uphill frame in all disciplines. **Walk:** The walk is very active and regular but lacks scope of movement.

Trot: Rick van de Noeste Hoeve is found to have much quality in trot. He has a very ground-covering trot with a hind leg that is powerfully placed under the body with very good flexion in the hock and good forward reach in the forelegs. Rick van de Noeste Hoeve displays more than satisfactory suppleness but lacks the required natural elevation. **Canter:** The canter shows good strides with scope and use of the body but he needs to develop a more uphill outline. He has shown to react well to canter training.

Riding horse aptitude:

Rick has a lot of aptitude for dressage. He gives his rider a good feeling, is easy to train and has good movement techniques. He finds it easy to work in a closed outline and extend his strides but he must learn to move in a more uphill frame.

Driving horse aptitude:

Thanks to his good locomotion techniques and satisfactory posture Rick van de Noeste Hoeve is found to have much aptitude for driven work although he would benefit from more elevation. He shows good trainability and has a lot of forward-go. Because of his powerful use of

the hind leg as well as forward-go he has a fine technique for show driving. In the foreleg we see good knee action combined with good reach in front. As a show driving horse Rick van de Noeste Hoeve lacks natural elevation and front.

Test results riding test:

Walk	7.0
Trot	7.0
Canter	7.5
Balance/carriage	7.0
Agility	7.0

Test results show driving test:

Use foreleg	7.5
Use hind leg	8.0
Suspension	7.5
Carriage	6.0
Front	6.5
Agility	7.0
Impulsion	8.0
Total	80.0

Findings Performance Test:

In the course of the test Rick van de Noeste Hoeve has shown to have lots of talent as a riding- and driving horse. For show driving work he is exceptionally talented in terms of movement techniques but lacks natural elevation. Rick van de Noeste Hoeve works with great gusto and a good attitude with good trainability

in all three disciplines and he is a pleasure to ride.

Final conclusion:

Rick van de Noeste Hoeve has a good lineage and a good exterior. He is found to have a talent for all three disciplines. On the basis of these findings the stallion will be registered in the Stallion Studbook under the name of **Rommert 498**.

Dam report:

General: Rommert 498's dam is the 13-year-old Star mare Lieske fan 'e Welle, a Jasper 366 daughter with good breeding type. She has satisfactory length in a correctly-positioned shoulder. She would benefit from a stronger top line but the loin section is wide and strong. Conformation of the croup is correct with good length. Because she is short in the forelegs her body shape has a downward build. Quality of the legwork is satisfactory. The walk is roomy with satisfactory activity. In trot this mare moves with great activity from the hock and steps powerfully forward under the body. She needs to develop a better posture in trot.

Dam line: Lieske fan 'e Welle stems from a strong dam line (pedigree 70). With for instance Rommert 498 and two preliminary Crown mares she rose to Preferent at a young age. After this Star mare there is a first premium Star mare by Oege 267 and the next mare in the dam line is also a first premium Star mare (Naen 264), again with the Preferent predicate and a total of 82 points in the IBOP Test.

Advice:

Rommert 498 is expected to enhance locomotion technique, willingness to work and work ethics. For breeding he can have a particularly positive influence on use of the hind leg. He should be paired to mares with uphill conformation.

Siert 499

Lineage: Dries 421 x Stb Pref*4 Sape 381 x Star Pref*5 Jochem 259 x Star Pref*4 Fokke 217
Date of birth: 26 April 2013 **Height:** 1,66 m
Pedigree: 38 **Kinship:** 17,6% (average)

Exterior:

Breeding type: Siert fan Wadway is a stallion who has both breeding type and an expressive head. The neck has satisfactory length, is well-shaped and has vertical feathers and coat colour is black with just a few white hairs on forehead and body.

Conformation: Siert fan Wadway is a very youthful stallion with satisfactorily correct conformation and a good rectangular build. He is slightly hollow in his mid-section but width and strength of his loin section are satisfactory. Length and slope of shoulder conformation are satisfactory. He has a lightly sloping croup with satisfactory length. His body shape is a little downhill. **Legwork:** The legwork shows satisfactory quality. Stance of the foreleg has a tendency to toeing-in but hind leg conformation is correct. Development of the feet is good.

DNA-tests: Hydrocephaly: non-carrier
Dwarfism: non-carrier
Chestnut factor: non-carrier

Veterinary:

Side remark X-ray testing: hock Near

a b c d e

Performance Test:

Training report: Siert fan Wadway has been selected for the Performance Test via the second-chance route. He has shown constant progress throughout the course of the test. He moves with great self-carriage and a lot of gusto clearly enjoying the work. He has made a lot of progress in the use of his body. He impressed with his good locomotion techniques and ample flexion in the hock. Riders as well as drivers were positive about his willingness to work and trainability. Siert fan Wadway should develop a bit more self-carriage for in-harness work.

Walk: He has a roomy, sound and active walk moving well through the body with plenty of shoulder freedom.

Trot: The trot is characterised by balance and scope combined with good locomotion technique, but he needs to develop better use of the body. His self-carriage in trot is eye-catching. Siert fan Wadway responds well to training in trot.

Canter: The canter strides show satisfactory uphill quality and more than satisfactory strength. He canters with good self-carriage and good engagement from the carrying hindquarters.

Riding horse aptitude:

Siert fan Wadway is found to have more than satisfactory aptitude for dressage. He combines willingness to work with a good attitude as well as good trainability, and is a joy to ride.

Driving horse aptitude:

Siert fan Wadway is found to have great driving horse aptitude. He catches the eye with his fine self-carriage and

willingness to work. He displays good trainability for this discipline. Siert fan Wadway has a talent for driving work. In this discipline he moves with a fine posture demonstrating an attractive front and good movement techniques. He must learn to move in a more uphill outline in this discipline.

Test results riding test:

Walk	7.0

Use foreleg	7.5
Use hind leg	7.5
Suspension	7.5
Carriage	7.0
Front	7.5
Agility	7.5
Impulsion	8.0
Total	82.5

Findings Performance Test:

Siert fan Wadway has shown much progress in the course of the test in all three disciplines and has completed a

good test leaving a positive impression on account of his self-carriage and locomotion techniques.

Final conclusion:

Siert fan Wadway has a very good lineage with five Preferent mares in succession. This youthful stallion has more than satisfactory exterior and has completed a good test. On the basis of these findings the stallion will be registered in the Stallion Studbook under the name of **Siert 499.**

Dam report:

General: Dam to Siert 499 is the 13-year-old Studbook mare Laura B. who displays more than satisfactory breeding type with her expressive head and long neck. The long shoulder has satisfactory slope. Muscling in the top line is a bit scant. The croup is slightly lacking in length and slanting. She has a horizontal body shape. Her legwork is of satisfactory quality. She shows satisfactory scope and power in movement.

Dam line: Siert 499 comes from a dam line that has done well in breeding and can boast 5 successive Preferent mares by respectively Sape 381 (Laura B. rose to Preferent on account of her first four progeny), Jochem 259, Fokke 217, Nanne 197 and Hylke 186 (pedigree 38). Fourth mare in the row is the well-known Model Preferent Performance mare Wijkje who is the dam of Studbook stallions Djurre 284 and Tsjerk 328.

Advice:

Siert 499 is expected to improve leg technique, willingness to work, model and classiness.

Report Progeny Test
December 2016

Wimer 461

Date of birth: 27-4-2007
Breeder: W. de Haan, Stiens
Owner: A. Minkema, Rottevalle
Lineage: Hinne 427 x Star Heinse 354 x Star Pref*5 Tjimme 275 x Fb Lammert 260 (pedigree 22)
Kinship: 17,7%

General:

Wimer 461 was approved at the age of three in the autumn of 2010 on the basis of his good lineage, his more than satisfactory exterior and his excellent results in the Central Examination. From his first stud season 70 foals were registered with 79% out of (minimum) Star mares. Wimer 461 completed the Progeny Test in 2016 based on two year collections of (minimum) 3-year-old descendants.

Exterior:

General: The Wimer 461 offspring are a uniform group of well-developed horses with uphill conformation, breed expression and most of them have a strong top line. The walk has scope of movement and is active. The trot is powerful showing plenty of balance and suppleness.
Breeding type: With their satisfactory expressiveness of heads, satisfactory, light head-neck connections and vertically-built necks the Wimer 461 offspring demonstrate breed expression. The blackness of their coats is often of a rather dull black quality and many of them are somewhat lacking in feathers.
Conformation: The Wimer 461 offspring

usually have correct conformation. They have a sloping shoulder, a long foreleg and present a nice uphill frame. Most have a good top line but some have a weak loin section. Croup conformation is often a bit short and with too much slope.
Legwork: Dryness of the legs is satisfactory. The pasterns are long. Shape of the feet is normal and stance of the foreleg is often toeing-out. Many have sickle-hocked hind legs.
Walk: The walk is regular with satisfactory scope and good activity of the hind leg.
Trot: The trot is roomy and powerful with plenty of suppleness and balance.

Training report and character:

In the yard the Wimer 461 offspring are without exception very agreeable horses but also a bit cheeky and obtrusive, very much making their presence felt. In work the horses are reliable but sometimes have a tendency to tense up and lose focus. Trainability is more than satisfactory.
Walk: De The walk has satisfactory length of stride and is regular with satisfactory activity.
Trot: The trot has more than satisfactory

room with a more than satisfactory, actively engaged hind leg.
Canter: Most of the offspring generally demonstrate an easy canter, moving with more than satisfactory balance and posture.

Riding horse aptitude:

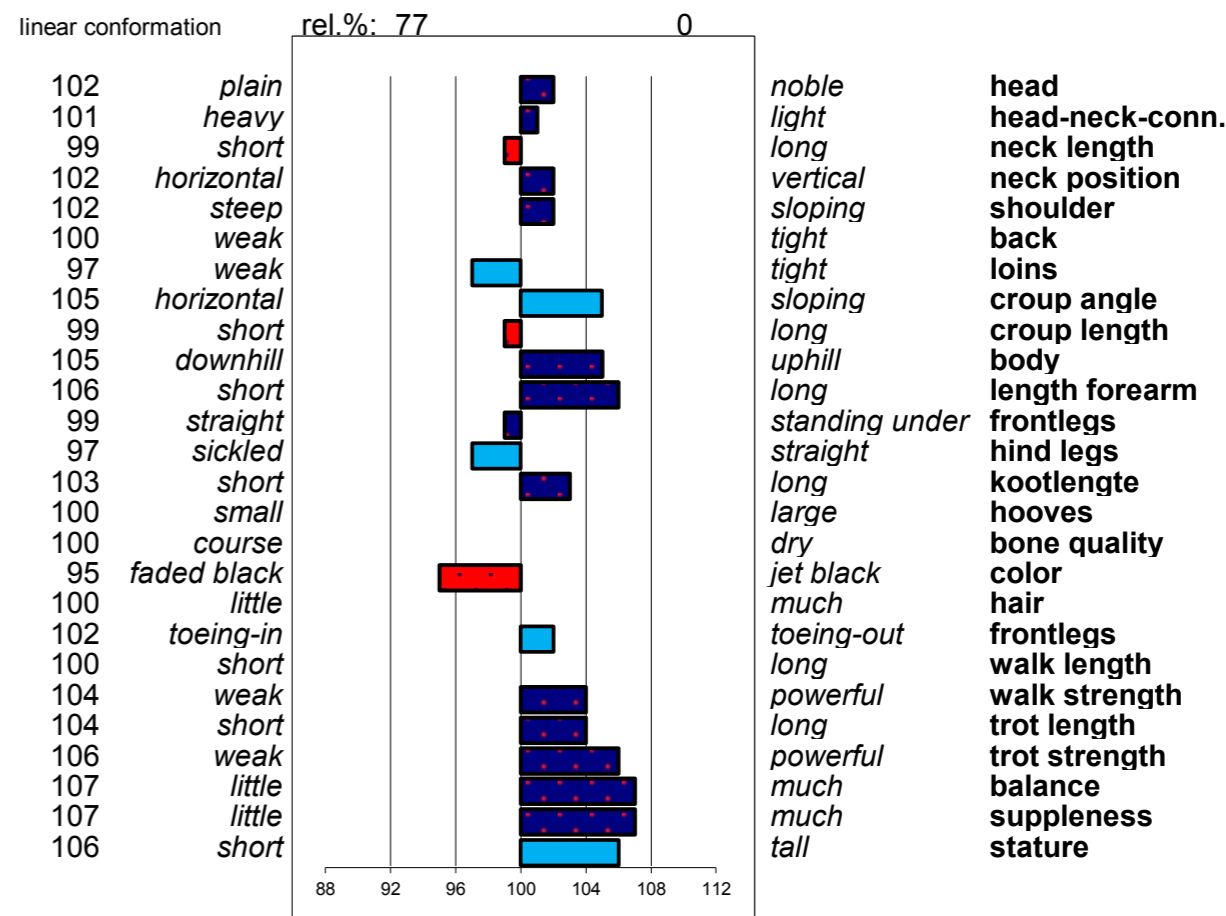

The offspring move with satisfactory scope and a more than satisfactory, active hind leg. Some of the horses struggle a little with lengthening of stride. Under saddle the horses demonstrate more than satisfactory suppleness.

Driving horse aptitude:

When working in-harness the horses would benefit from more scope in walk. In trot the horses display more than satisfactory activity of the hind leg. In show driving work the horses display more than satisfactory posture. They need to develop more forward reach in the foreleg.

Conclusion:

Wimer 461 has fairly favourable hereditary qualities for both exterior and sport aptitude and on these grounds his breeding licence will be sustained.

Report Progeny Test
December 2016

Wytse 462

Date of birth: 4-5-2007
Breeder: J.A.M. Kruis, Heeg
Owner: J.A.M. Kruis, Heeg
Lineage: Arjen 417 x Star Pref*6 Oege 267 x Model Pref*9 Reitse 272 x Star Jochem 259 (pedigree 15)
Kinship: 17,7%

General:

Wytse 462 was approved in the autumn of 2010 at the age of three on the basis of his good lineage, his more than satisfactory exterior and his good results in the Central Examination. From his first stud season 29 foals were registered with 60% out of (minimum) Star mares. It must be said that compared to his peers in his year collection Wytse 462 has been at a disadvantage, both in qualitative as well as quantitative terms. Wytse 462 completed the Progeny Test in 2016 based on two year collections of (minimum) 3-year-old descendants. The number of inspected/scored offspring stands at 21, which is (19) not sufficient for a permanent assessment. His final assessment will therefore take place in 2017.

Exterior:

General: All Wytse 462 offspring have remarkably noble heads. They are slightly lacking in development and would benefit from a more long-lined and upward build. Stance of the legs should be more correct. The horses are found to have a remarkably good walk.
Breeding type: Wytse 462's descendants catch the eye with their wonderfully noble heads. The head-neck connection is often rather heavy, the necks lack length and should have a more vertical build. The horses have jet black coat colour and satisfactory feathers.

Conformation: The offspring by Wytse 462 often stand in a classical model and are stocky-looking horses that need a more upward build. The foreleg could do with a bit more length and steep shoulder conformation is quite common. The necks are often lacking length but the top lines are usually strong. Their croups have good conformation and satisfactory length.

Legwork: Dryness of the legs is satisfactory. Stance of the foreleg is frequently toeing-out. Stance of the hind leg is often found to be sickle-hocked.

Walk: The walk is regular, roomy and powerful.

Trot: The trot demonstrates scope and satisfactory power, but the hind leg should be placed more forward under the body with more alacrity. The horses need to develop more balance and suppleness.

Training report and character:

The Wytse 462 offspring are all without exception very pleasant horses with good stable manners. In the work they show satisfactory reliability and are found to be fairly sensitive horses whose responsiveness to aids is more than satisfactory. The horses demonstrate more than satisfactory willingness to work and stamina but some are easily distracted.
Walk: The walk shows more than satisfactory activity, regularity and scope of movement.

Trot: The trot has satisfactory scope of movement. The locomotion rhythm is rather variable ranging from a high rhythm to a fairly sluggish hind leg. In trot the horses must move with more self-carriage.

Canter: Canter strides are fairly short and the canter generally lacks self-carriage and elevation.

Riding horse aptitude:

The horses need to develop more self-carriage under saddle and are found to struggle with transitions. They would benefit from more use of the body.

Driving horse aptitude:

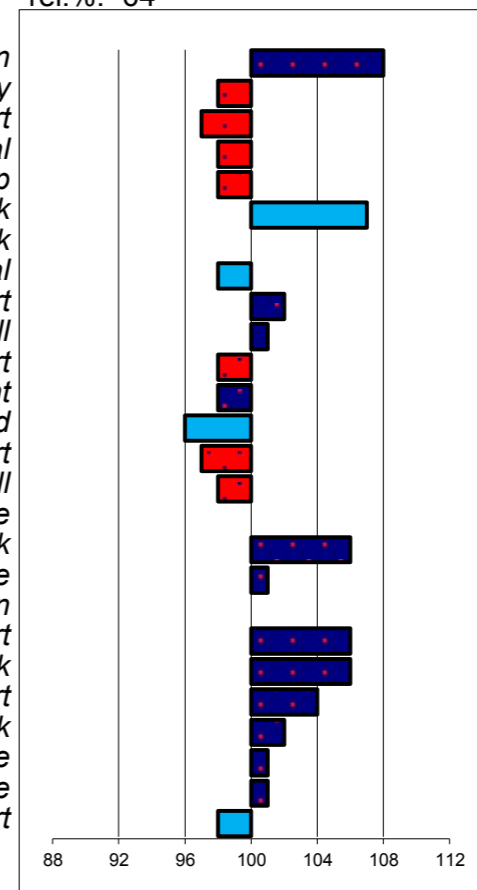

For the in-harness work the horses need more self-carriage and suppleness. The horses lack posture and the foreleg must move with more forward reach from the shoulder. Therefore the horses are found to have little show driving aptitude.

Conclusion:

Wytse 462 is found to have slightly positive hereditary qualities for exterior and slightly unfavourable hereditary qualities for sport aptitude. On the basis of these findings the stallion's breeding licence will temporarily be sustained. His hereditary qualities will be re-assessed as soon as a minimum of 40 of his offspring have been inspected/scored.

December 2016

Wylster 463

Date of birth: 11-6-2007
Breeder: G. vd Veer-Jellema, Tijnje
Owner: G.A. Bouma, Oldeboorn
Lineage: Rindert 406 x Model Pref*6 Prest Rypke 321 x Model Pref*4 Lute 304 x Star Teake 273 (pedigree 115)
Kinship: 18,3%

General:

Wylster 463 was approved at the age of three in the autumn of 2010 on the basis of his strong lineage, his more than satisfactory exterior and above all his good results in the in-harness disciplines of the Central Examination. From his first stud season 72 foals were registered with 73% out of (minimum) Star mares. Wylster 463 completed the Progeny Test in 2016 on the basis of two year collections of (minimum) 3-year-old descendants.

Exterior:

General: In terms of quality the offspring are found to be a fairly diverse group of individuals. Even though the average impression is not really above average, the first two crops contain a number of attractive horses with high premiums. The Wylster 463 offspring are well-developed horses with satisfactory breed expression but generally lack quality in conformation.
Breeding type: The Wylster 463 offspring have more than satisfactory feathers and remarkably light head-neck connections. Expressiveness of heads is satisfactory. Neck conformation is often somewhat horizontal.

Conformation: Wylster 463's progeny are lacking in quality of conformation. Steep shoulder conformation is quite common. They have a long foreleg and horizontal

frames. Length of the neck is satisfactory but flowing connections from neck to back are often rather moderate. The top lines are often found to be tight and lack strength in the back-croup connection. Croup conformation shows average length and in many cases too much slope.

Legwork: Dryness of the legs is satisfactory. The pasterns are remarkably long ending in large feet. Stance of the foreleg is occasionally toeing-in and stance of the hind leg is often sickle-hocked. **Walk:** The walk shows satisfactory power and average length of stride. In walk the horses should develop better use of the hock.

Trot: The trot has more than satisfactory scope but the hind leg needs to step under the body with more determination. The horses move with satisfactory balance but many are lacking in use of the body.

Training report and character:

The Wylster 463 offspring are pleasant and calm horses with good stable-manners. In work the horses are reliable but they need to improve in terms of trainability. They display more than satisfactory willingness to work.

Walk: The walk shows satisfactory scope of movement. The horses need to develop more use of the hock and must learn to move with better use of the body in walk. Some of the horses are found to

struggle with tact. **Trot:** The trot has more than satisfactory scope of movement. The horses would benefit from more activity of the hind leg that should be placed under the body with more zest. They have more than satisfactory forward reach in the foreleg.

Canter: In canter the horses move with more than satisfactory strides and engagement from behind as well as balance. In canter the horses move in a satisfactory to more than satisfactory upward outline.

Riding horse aptitude:

In spite of a moderate walk the offspring demonstrate to have a more than satisfactory trot and canter with more than satisfactory suppleness.

Driving horse aptitude:

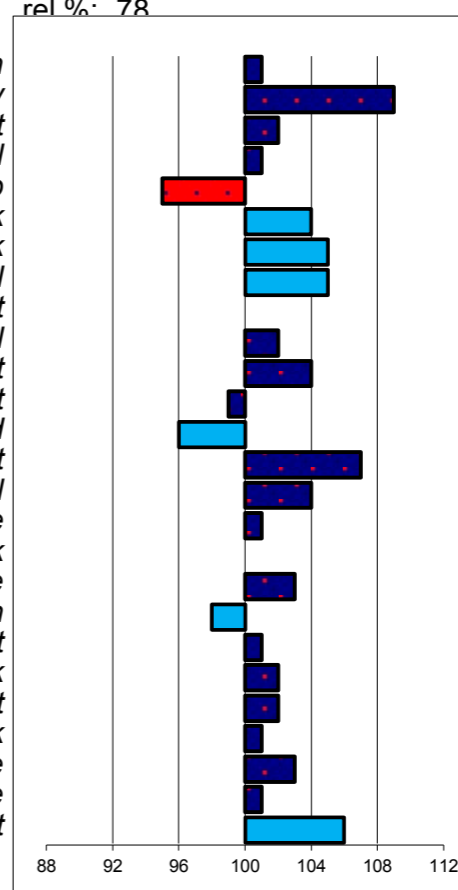

With the in-harness work the horses move with satisfactory self-carriage and a foreleg that shows satisfactory activity with more than satisfactory forward reach. The horses must learn to move with more engagement from the hind leg.

Conclusion:

Wylster 463 is found to have neutral hereditary qualities for both exterior and sport aptitude and on the basis of these findings his breeding license will be sustained.

Report Progeny Test
December 2016

Wolfert 467

Date of birth: 5-4-2007
Breeder: J.B. Lensink, Aalten
Owner: P. Both & Stoeterij Bommelsteyn, Joure
Lineage: Felle 422 x Stb Jakob 302 x Star Pref*6 Jurjen 303 x Star Pref*5 Tsjalling 235 (pedigree 2)
Kinship: 17,3%

General:

Wolfert 467 was approved in the autumn of 2011 at the age of four on the basis of his, in terms of quality, more than satisfactory lineage, his more than satisfactory exterior and his good results in the Central Examination. From his first stud season 80 foals were registered with 84% out of (minimum) Star mares. Wolfert 467 completed the Progeny Test in 2016 based on one crop of 3-year-old descendants. The number of inspected/scored offspring stands at 27, which is (13) not sufficient for a permanent assessment. His final assessment will therefore take place in 2017.

Exterior:

General: The Wolfert 467 offspring are well-developed, slightly mature-looking horses with satisfactory breeding type. Their legwork should have more quality. Walk and trot are more than satisfactory. **Breeding type:** The heads have satisfactory expressiveness. Head-neck connections are satisfactorily light and necks are long with satisfactory vertical build. The horses have satisfactory feathers and black coat colour.

Conformation: Many of the Wolfert 467 offspring lack youthfulness. Shoulder conformation is steep but uphill build of the horses is satisfactory. The necks are remarkably long. Back conformation is

often tight with a weak loin section. The overall straight croups need more length. **Legwork:** The legwork is puffy and especially the quality of the hock is moderate. The pasterns are long and size of the feet is satisfactory. Quite frequently stance of the foreleg is toeing-in and stance of the hind leg straight. **Walk:** The walk must show more activity but is roomy with satisfactory strength. **Trot:** The trot is ground-covering with satisfactory strength but the hind leg comes from relatively far behind and is sluggish. The horses lack suppleness and posture.

Training report and character:

The Wolfert 467 offspring have pleasant stable manners although some individuals appear to be a bit anxious. In work they are found to be reliable horses. It is a group of fairly sensitive horses with good responsiveness to the aids and therefore they demonstrate good trainability. They have noticeably good willingness to work and stamina.

Walk: The walk is regular and ground-covering with more than satisfactory activity of the hind leg.

Trot: The trot is roomy but the hind leg should step more forward under the body with slightly more alacrity. **Canter:** The canter has satisfactory to more than satisfactory quality of stride. In canter

the horses move with more than satisfactory balance and posture.

Riding horse aptitude:

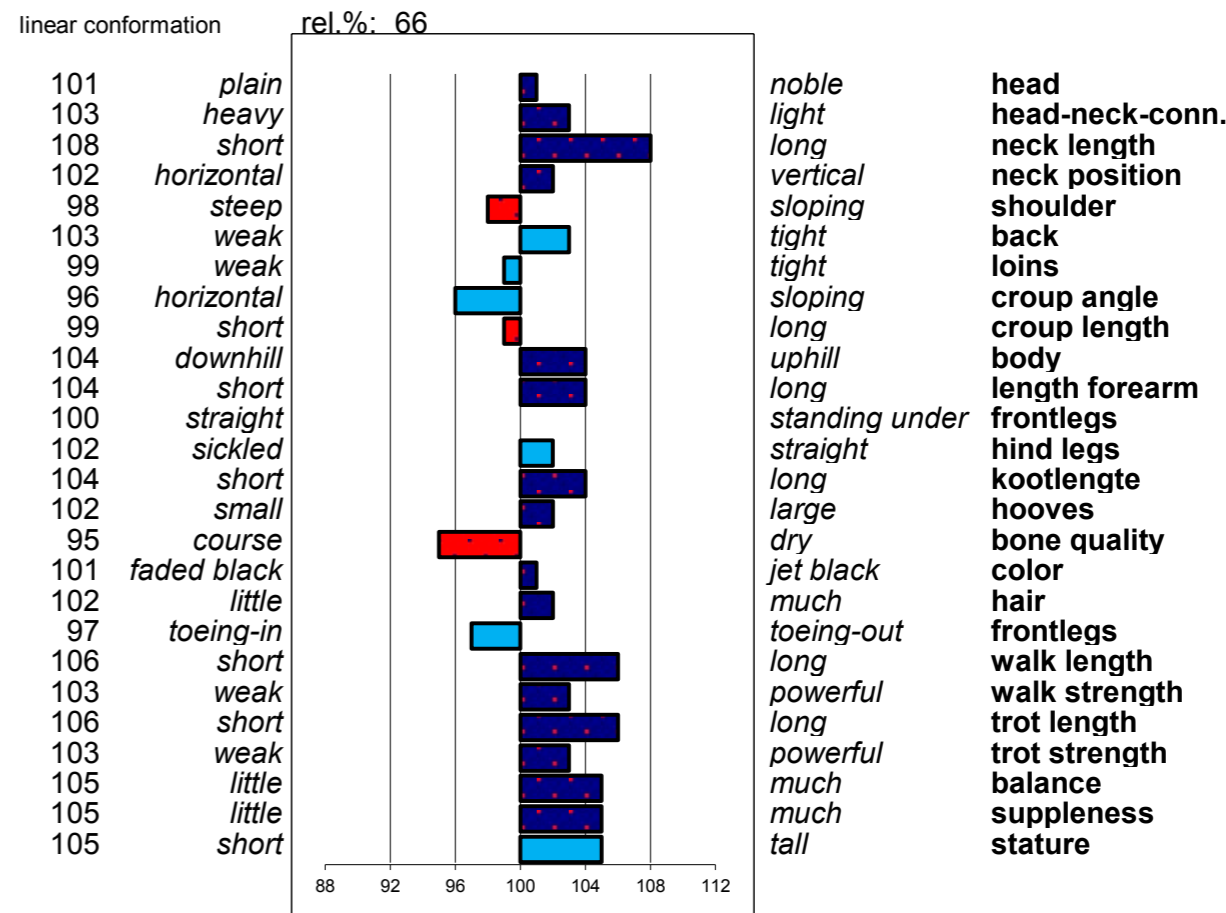

Under saddle the horses demonstrate three good basic gaits and display more than satisfactory suppleness and talent for transitions. Movement of the hind leg must be a little faster.

Driving horse aptitude:

In the in-harness work the offspring easily move through their bodies. Therefore all the tested offspring completed the test with satisfactory scores for the show driving test. Still, for show driving the horses must learn to move with more front. They have more than satisfactory posture but must develop a little more carrying capacity in the hind leg.

Conclusion:

Wolfert 467 is found to have neutral hereditary qualities for exterior. His breeding value for sport aptitude is found to be positive. On the basis of these findings Wolfert 467's breeding licence will temporarily be sustained. His hereditary qualities will be re-assessed as soon as a minimum of 40 of his offspring have been inspected/scored whereby particular attention will be paid to the quality of legwork.

Alwin 469

Date of birth: 14-4-2008
Breeder: B.L. Brouwer, Zandhuizen
Owner: Stoeterij Bommelsteyn, Expl. St. Hemrik & J. v.d. Broek, Joure
Lineage: Felle 422 x Star Tsjerk 328 x Stb Pref*4 Oege 267 x Star Cobus 248 (pedigree 10)
Kinship: 18,2%

General:

Alwin 469 was approved in the autumn of 2011 at the age of three on the basis of his, in terms of quality, more than satisfactory lineage, his more than satisfactory exterior and his good results in the Central Examination. From his first stud season 61 foals were registered with 79% out of (minimum) Star mares. Alwin 469 completed the Progeny Test in 2016 based on one crop of 3-year-old descendants.

Exterior:

General: The Alwin 469 offspring are a uniform group of modern-type, well-developed and long-lined horses radiating breed expression. They often have a tight top line but the legwork radiates quality. Long hind legs are quite frequent. When presented in-hand the horses display a good walk and trot. The first crop has produced a number of attractive horses with high premiums and an above average number of horses from this first crop have been inspected.

Breeding type: With their exceptionally noble heads, light head-neck connections and long necks with satisfactory vertical build all horses exude breed expression. Most of them flaunt abundant feathers and jet black coat colour.

Conformation: Alwin 469's offspring are mostly correctly-built horses with long top lines. They have a sloping shoulder,

with a long foreleg and present a nice uphill frame. Top line is tight and particularly the tightness of the loin section is noticeable. Croups are long with good conformation.

Legwork: The legwork radiates a lot of quality. Pasterns are often short and the feet are slightly under size. Toeing-out of the foreleg is quite common. They generally have long, sickle-hocked hind legs.

Walk: The walk is very roomy and strong showing good activity.

Trot: The trot is very roomy with more than satisfactory power and lots of balance and suppleness. Some move with a thrusting movement in trot. Stepping forward under the body generally must be done with more speed from the hind leg.

Training report and character:

The Alwin 469 offspring are pleasant and relaxed horses. In work they prove to be reliable, imperturbable horses with more than satisfactory trainability. They have more than satisfactory learning capacity but some should be a bit more responsive to the aids.

Walk: The walk presents variable quality in terms of length of stride. Relatively many offspring struggle with tact and rhythm in the walk.

Trot: The trot has more than satisfactory scope of movement. The hind leg is often

a little bit late and should be placed under the body with more determination. In trot the horses move with more than satisfactory suppleness. **Canter:** In canter the horses move with more than satisfactory length of stride and show more than satisfactory balance and posture.

Riding horse aptitude:

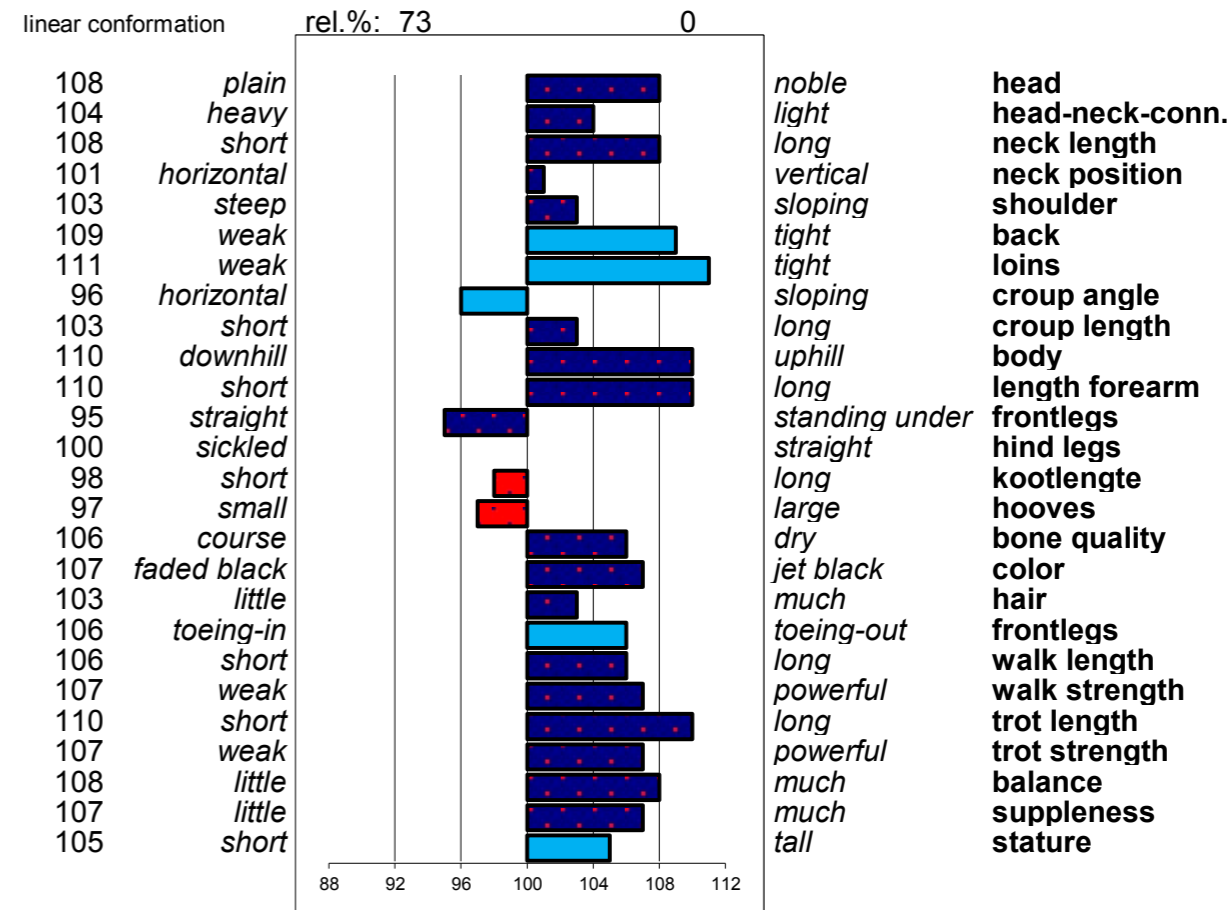

In under-saddle work the horses display satisfactory to more than satisfactory balance and suppleness but must develop more carrying capacity in the hind leg. This is why they must also improve their capacity for transitions. The walk is a point of concern.

Driving horse aptitude:

For in-harness work the Alwin 469 offspring need more carrying capacity and must move with more alacrity of the hind leg. The moment of suspension and posture are more than satisfactory.

Conclusion:

Alwin 469 has very positive breeding values for exterior. In work the quality of basic gaits is decidedly less than in-hand. Therefore the hereditary qualities for sport aptitude are considered neutral. On the basis of his overall hereditary image Alwin 469's breeding license will be sustained.
